[Gunsmith Tools](#) > [Shotgun Tools](#) > [Straighteners & Dent Raisers](#)

In the past, installing a magazine tube extension on one of the 870/1100/11-87 series of shotguns was as simple as removing the mag cap, prying up the magazine spring retainer and swapping out springs before screwing on the extension. With the advent of the detent style magazine spring & mag cap retention system this is no longer possible. Now one has to find a way to remove those detents so the follower can slide past them. The most common solution is to grind them away from the inside; while effective, this looks terrible and creates two ready access holes in the mag tube for dirt & other debris. XS® Sight Systems Magazine Tube Swage will allow you to easily remove these detents without creating these holes.

Instructions for Installation and Usage

Follow these steps carefully to install and use the MAGAZINE TUBE DETENT SWAGE:

1. Preparation:

- Ensure that your shotgun is completely unloaded.
- Gather all necessary tools and safety equipment.

2. Removing the Magazine Cap:

- Carefully unscrew the magazine cap from the magazine tube.
- Set the magazine cap aside in a safe location.

3. Accessing the Magazine Spring Retainer:

- Use the appropriate tool to pry up the magazine spring retainer gently.
- Be cautious not to damage the retainer or surrounding components.

4. Using the MAGAZINE TUBE DETENT SWAGE:

- Insert the MAGAZINE TUBE DETENT SWAGE into the magazine tube.

- Align the swage with the detents to be removed.
- Apply a controlled amount of pressure to remove the detents without damaging the tube.

5. Final Steps:

- Once the detents are removed, reassemble the magazine tube by reversing the steps above.
- Ensure that all components are secured properly before using the shotgun.

Disposal Instructions

When disposing of the MAGAZINE TUBE DETENT SWAGE, please follow these guidelines:

- Do not dispose of the product in household waste.
- Check local regulations for proper disposal methods.
