

# 1911 LUG CUTTER COMPONENTS - BROWNELLS 0.195" 1911 LUG CUTTER ONLY

[Gunsmith Tools](#) > [Handgun Tools](#) > [Barrel Tools](#) > [Barrel Lug Tools](#)

A hand operated, carbide cutter easily trims excess material from the bottom barrel lug when fitting custom or factory barrels to 1911 autos. These cutters remove material from the barrel lugs in a parallel fashion, and with the correct height and radius, to help produce the best possible lockup. It is recommended to use the 0.186" cutter first, then progress to the 0.195" cutter if more material needs to be removed. Follow with careful hand fitting to achieve a firm, non-binding barrel-to-slide fit. Start small and check your work often. It is possible, with some slide/barrel combinations, that the 0.195" cutter could remove more material than necessary. Fits all 1911 Auto, Commander, Officer, single and double-stack frames. The 0.186" Lug Cutter, and 0.195" model are available with or without the handle. The handle is also available individually.

## Attributes

- Name: [BROWNELLS 0.195" 1911 LUG CUTTER ONLY](#)
- Manufacturer: [BROWNELLS](#)
- Product no.: 080000063

# Safety Instruction Guide for 1911 Lug Cutter Components

## Introduction

Thank you for choosing the 1911 Lug Cutter Components by Brownells. This guide provides essential safety instructions and guidelines to ensure the safe use of the product. Please read this document carefully before using the cutter.

## General Safety Guidelines

- Always use the cutter in a wellventilated area.
- Wear appropriate personal protective equipment (PPE), including safety glasses and gloves, to protect against debris and sharp edges.
- Keep the cutter out of reach of children and unauthorized users.
- Ensure that the cutter is used only for its intended purpose as described in this guide.
- Regularly inspect the cutter for any signs of wear or damage before each use. Do not use if damaged.
- Follow all local regulations regarding the storage and disposal of tools and equipment.

## Specific Safety Precautions for Use

- Ensure that the workpiece is securely clamped or held in place to prevent movement while cutting.
- Use the cutter only on materials specified in the product description. Do not attempt to cut materials for which the cutter is not designed.
- Start with the smaller 0.186" cutter before progressing to the 0.195" cutter to minimize material removal.
- Avoid applying excessive force when using the cutter to prevent damage to the tool and workpiece.
- Always check your work frequently to avoid overcutting.

## Instructions for Installation and Usage

### 1. Preparation:

- Gather all necessary materials, including the 1911 Lug Cutter, a suitable workpiece, clamps, and safety equipment.
- Ensure your workspace is clean and organized.

### 2. Using the Cutter:

- Begin with the 0.186" cutter:
  - Insert the cutter into the designated area of the workpiece.
  - Operate the cutter by hand, applying steady pressure to trim excess material from the barrel lug.
- If more material needs to be removed, switch to the 0.195" cutter:
  - Follow the same procedure as above.
- Always check the fit of the barrel to the slide after each cut to ensure proper alignment and fit.

### 3. PostUse Care:

- Clean the cutter after use to remove any debris or residue.
- Store the cutter in a safe and dry location, away from children and pets.

## **Disposal Instructions**

- Dispose of any damaged or wornout cutters according to local regulations.
- Avoid disposing of the cutter in regular household waste if it is deemed hazardous. Check with local waste management authorities for proper disposal methods.

## **Contact Information for Further Support**

For any safety inquiries or product support, please refer to the manufacturer's website or customer service resources available in your region.

By following these safety instructions, you can ensure a safe and effective experience with the 1911 Lug Cutter Components. Thank you for your attention to safety and proper usage.
