## Longer Bits Reach Through Rings

BROWNELLS MAGNA-TIP® SEE-THRU RING BITS The Brownells MAGNA-TIP® See-Thru Ring Bits are specialized tools designed to facilitate the installation and removal of scope rings with see-through mounts. These extra-long bits are engineered to reach through the scope rings, allowing for efficient engagement with the mounting screws without necessitating scope removal.

Description and Features:

Extra-Long Design: The extended length of these bits enables them to reach through see-through scope rings, providing direct access to the mounting screws. This design feature eliminates the need to remove the scope during installation or adjustment, thereby preserving the scope's alignment and zero.

Precision Fit: Each bit is hollow-ground to ensure a precise fit in slotted screws, minimizing the risk of cam-out and potential damage to the screw heads or firearm components.

Durable Construction: Crafted from hardened steel, these bits offer exceptional strength and longevity, making them suitable for repeated use in demanding gunsmithing tasks.

Available Options: The MAGNA-TIP® See-Thru Ring Bits are available in specific sizes to accommodate common screw dimensions used in scope mounts:

- #6 Slot: Shank Diameter (SD) = .180 inches, Blade Thickness (BT) = .037 inches.
- #8 Slot: Shank Diameter (SD) = .210 inches, Blade Thickness (BT) = .037 inches.
- 3/32" Hex: Designed to fit Leupold scope rings.
- 7/64" Hex: Designed to fit Redfield scope rings.
