Provides Accurate, Consistent Setup; Saves Valuable Shop Time

Precision made, steel V-block provides consistent, repeatable machine setups and avoids costly milling mistakes while improving production time. V-block jig acts like a vise and clamps the rifle bolt at the correct milling angle for the perfect extractor cut. Compact unit fits standard mill vises and provides plenty of working space for fast, accurate turn-around. A must-have for fitting Sako extractors to Remington 700 bolts. Instructions included.

REMINGTON 700 SAKO EXTRACTOR INSTALLATION JIG Safety Instruction Guide

Introduction

Thank you for purchasing the REMINGTON 700 SAKO EXTRACTOR INSTALLATION JIG. This guide provides essential safety instructions and operational guidelines to ensure safe and effective use of the product. Please read this document carefully before using the jig.

General Safety Guidelines

- Ensure that the workspace is clean and free of any obstructions before beginning installation.
- Always wear appropriate personal protective equipment (PPE) such as safety glasses and gloves.
- Keep the jig and all tools out of reach of children and vulnerable individuals.
- Do not modify the jig or use it for purposes other than intended.
- Always follow the manufacturer's instructions for installation and usage.
- If you feel unwell or distracted, do not attempt to use the jig.

Specific Safety Precautions for Use

- Ensure that the jig is securely clamped to the milling machine before use.
- Do not exceed the recommended milling speed as specified in the milling machine's manual.
- Use only compatible rifle bolts and extractors as specified in the product details.
- Avoid wearing loose clothing or jewelry that may get caught in machinery.
- If any part of the jig is damaged or worn, discontinue use immediately and replace it.
- Always keep hands and body parts away from moving parts during operation.

Instructions for Installation and Usage

1. Preparation:

- Gather all necessary tools and materials including the jig, rifle bolt, extractor, and milling machine.
- Ensure that the milling machine is turned off and unplugged before starting the setup.

2. Setting Up the Jig:

- Place the jig on the milling machine's table.
- Secure the jig using the machine's vise to ensure stability.
- Adjust the jig to the correct milling angle as per the specifications.

3. Clamping the Rifle Bolt:

- Insert the rifle bolt into the Vblock of the jig.
- Ensure that the bolt is clamped securely at the correct angle.
- Doublecheck the alignment before proceeding.

4. Milling Process:

- Turn on the milling machine and select the appropriate speed.
- Carefully lower the milling cutter to begin the extractor cut.
- Monitor the process closely and make adjustments as necessary.

5. Finishing Up:

- Once the milling is complete, turn off the machine and unplug it.
- Carefully remove the rifle bolt from the jig.
- Inspect the extractor cut for accuracy and finish.

Disposal Instructions

- When the jig reaches the end of its life or is no longer usable, dispose of it in accordance with local regulations for metal waste.
- Do not dispose of the jig in regular household waste.
