

FILLISTER HEAD SCREW KIT - 8-40X1" FILLISTER HEAD SCREW 12 PACK

[Gunsmith Tools & Supplies](#) > [Small Hardware](#) > [Metal Screws](#)

All Standard Thread Sizes From "0" To "12"

With this kit you can stop searching for those hard-to-find screws that are stocked by only a few specialized manufacturing supply houses . . . we have done the looking for you. You can have that "just right" screw right at your fingertips, in a handy, very complete kit . . . and at quite a substantial savings. The kit contains 12 each of the 20 popular size screws from No. 0 wire gauge to No. 12 wire gauge in long enough lengths to fit many difficult jobs, yet they can be cut off and fitted where a shorter length is required. Slotted head drive type. We strongly suggest that after the screws are cut and trimmed, they be dipped in OXPHO-BLUE to give them a blue color as well as prevent rusting which could otherwise ruin a fine job.

FILLISTER HEAD SCREW KIT 840X1" FILLISTER HEAD SCREW 12 PACK Safety Instruction Guide

Introduction

Thank you for choosing the Fillister Head Screw Kit. This guide provides essential safety instructions and guidelines to ensure the safe use of the screws included in this kit. Please read this document carefully before using the product.

General Safety Guidelines

- Ensure that all screws are used in accordance with the intended applications.
- Keep the kit out of reach of children to prevent accidental injury.
- Inspect screws for any damage or defects before use. Do not use damaged screws.
- Avoid using screws in environments where they may be exposed to extreme heat or corrosive substances.
- Always wear appropriate personal protective equipment (PPE) such as safety glasses and gloves when handling screws.

Specific Safety Precautions for Use

- When cutting screws to length, ensure that you are using the appropriate tools and that they are in good condition.
- After cutting, dip screws in OXPHOBLUE to prevent rust and enhance durability.
- Be cautious of sharp edges when handling cut screws.
- Do not exceed the recommended load limits for the screws as specified by the manufacturer.
- If you experience any discomfort or notice unusual conditions while using the screws, stop and seek assistance.

Instructions for Installation and Usage

1. Preparation:

- Gather all necessary tools, including a screwdriver suitable for slotted head screws.
- Ensure your workspace is clean and free of hazards.

2. Selecting the Right Screw:

- Choose the appropriate screw size from the kit based on your project requirements.
- Refer to the size specifications: No. 0 wire gauge to No. 12 wire gauge.

3. Cutting the Screws:

- If a shorter screw length is needed, use a cutting tool to trim the screw to the desired length.
- Ensure you wear safety glasses during this process to protect your eyes from metal shavings.

4. Dipping in OXPHOBLUE:

- After cutting, dip the screws in OXPHOBLUE to provide a protective coating against rust.
- Allow screws to dry completely before installation.

5. Installation:

- Align the screw with the predrilled hole in the material.

- Use the appropriate screwdriver to drive the screw into place, ensuring it is secure but not overtightened.

6. PostInstallation:

- Inspect the installed screws to ensure they are properly seated and secure.
- Clean up any debris from the work area.

Disposal Instructions

- Dispose of any unused or damaged screws in accordance with local regulations.
- Do not dispose of screws in regular household waste if they are considered hazardous.
- Check with local waste management authorities for proper disposal methods.
