

# BLANK SCREW KIT - BROWNELLS BLANK SCREW REFILL #10 HEAD 0.303" O.D. 20 PACK

[Gunsmith Tools](#) > [Small Hardware](#) > [Metal Screws](#)

## Gun Screws Unlimited; With Drill Press & Dies You Can Make Most Gun Screws

All that is needed is a die with the right threads to make a vast variety of gun screws simply and immediately! You will also need a file, and either a drill press or a pin vise. You can give them any thread length, any overall length and any head thickness desired. Blanks are made of easy-to-thread, tough, forging steel. If hard wearing surface is desired after threading, screws should be treated in Brownells Surface Hardening Compound (#083-000-033).

## Attributes

- Name: [BROWNELLS BLANK SCREW REFILL #10 HEAD 0.303" O.D. 20 PACK](#)
- Manufacturer: [BROWNELLS](#)

# BLANK SCREW KIT SAFETY INSTRUCTIONS

## Introduction

Thank you for choosing the Blank Screw Kit by Brownells. This product is designed for the creation of custom screws for various applications. While this product is safe when used correctly, it is important to follow the safety guidelines and instructions provided in this document to ensure safe usage.

## General Safety Guidelines

- Always read and understand all safety instructions before using the product.
- Ensure that you are using the appropriate tools and equipment for the task.
- Keep the product out of reach of children and vulnerable individuals.
- Inspect the kit for any visible damage before use. If any parts are damaged, do not use the product.
- Use personal protective equipment (PPE) such as safety glasses and gloves when handling tools and materials.
- Report any unsafe products or accidents to the appropriate authorities.
- Regularly check for recall updates on the EU's Safety Gate platform.

## Specific Safety Precautions for Use

- Ensure that the die used for threading matches the specifications of the screws being created.
- Use a file to smooth any rough edges on the screws to prevent injury.
- When using a drill press or pin vise, ensure that your hands and other body parts are kept clear of moving parts.
- Do not exceed the recommended torque specifications when tightening screws to avoid stripping threads.
- Be cautious of sharp edges on the screws and dies during handling and installation.
- Always work in a wellventilated area to avoid inhaling any dust or debris created during the threading process.

## Instructions for Installation and Usage

### 1. Preparation

- Gather all necessary tools: die, file, drill press or pin vise, and the Blank Screw Kit.
- Ensure your workspace is clean and organized.

### 2. Threading the Screws

- Select the appropriate die for the size of the screw you wish to create.
- Secure the blank screw in the drill press or pin vise.
- Carefully thread the screw using the die, applying even pressure.
- Use a file to smooth any rough edges after threading.

### 3. Finalizing the Screws

- Check the thread length and overall length to ensure they meet your specifications.
- If a hardwearing surface is desired, treat the screws with Brownells Surface Hardening Compound (#083000033) after threading.

### 4. Installation

- Ensure the surface where screws will be installed is clean and free of debris.
- Use a screwdriver or appropriate tool to install the screws, ensuring not to overtighten.

## Disposal Instructions

- Dispose of any unused or damaged screws responsibly.
- Follow local regulations for the disposal of metal products.
- Do not dispose of screws in regular household waste if they are hazardous or damaged.

## Contact Information for Further Support

For any questions or concerns regarding the Blank Screw Kit, please refer to the manufacturer's contact details provided with the product packaging or visit the official website for further assistance.

By following these safety instructions and guidelines, you can ensure a safe and effective experience with your Blank Screw Kit. Always prioritize safety and proper handling to avoid accidents and injuries.
