State-Of-The-Art Bits For The Gun Shop or Workshop

With Brownells MAGNA-TIP screwdriver, it is now possible for the gunsmith and firearms hobbyist to have a close fit in most any gun screw he will encounter - and darn near everything around the house and garage too. DESIGN OF BITSThe TRUE hollow-ground bit transmits all the energy of twist (torque) evenly and smoothly, up the shank of the bit. Not only does hollow grinding permit this power transfer, it also gives complete metal-to-metal contact between the tip of the bit and the entire screw slot. Thus, maximum power can be exerted as in a finely tapered gun spring. So-called "hollow-ground" screwdrivers which have been dubbed off square, result in all torque pressures concentrating at the square edge of the grind along the tip. As every gunsmith knows, such a flaw in a spring results in breakage! Standard, straight-tapered screwdrivers deliver all torque pressures to the fine edge of the screw slot. PLUS, being tapered, the laws of simple physics force the bit OUT of the slot. The complete sets include eleven bits for slotted screws, #1, #2 and #3 Phillips bits, plus ten hex bits for socket head screws. PERFECT FITYou can get even more versatility, and an absolutely perfect bit-to-screw-slot fit by buying extra bits and grinding them to an exact fit using the special Shaping Stone shown on this page. MATERIALS USEDThe bits used in the Brownells MAGNA-TIP screwdrivers are manufactured expressly for heavy industry. They are used in high-speed, production, impact-power drivers for setting screws in mass production applications. They HAVE to be built with the right combination of hardness and durability to give maximum strength and wear!

MAGNATIP® BITS Safety Instruction Guide

Introduction

Thank you for choosing the MAGNATIP® BITS MAGNATIP BIT #4402, SD=PHILLIPS #2. This guide provides essential safety instructions and guidelines to ensure the safe use of your product in compliance with the EU General Product Safety Regulation (GPSR). Please read this manual carefully before use.

General Safety Guidelines

- Ensure safe handling and usage of the MAGNATIP® BITS to prevent accidents and injuries.
- Always use the product as intended and follow the instructions provided.
- Be aware of potential hazards associated with improper use, including injury from slips or tool failure.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly inspect the bits for wear and damage before use.
- Report any unsafe products or accidents to appropriate authorities.

Specific Safety Precautions for Use

- Always wear appropriate personal protective equipment (PPE) such as safety glasses and gloves when using the MAGNATIP® BITS.
- Ensure that the screwdriver is securely attached to the bit before use.
- Avoid using excessive force when tightening screws to prevent stripping the screw head or damaging the bit.
- Use the correct bit size for the screw to ensure a proper fit and avoid slippage.
- Do not use the bits for purposes other than those intended, such as prying or hammering.
- Store the bits in a dry place and avoid exposure to moisture to prevent rust and degradation.

Instructions for Installation and Usage

1. Selecting the Correct Bit:

- Choose the appropriate MAGNATIP® bit for the screw type and size.
- Ensure the bit is compatible with your screwdriver.

2. Attaching the Bit:

- Insert the bit into the screwdriver's shank until it clicks into place.
- Ensure that the bit is firmly secured before use.

3. Using the Screwdriver:

- Align the bit with the screw slot.
- Apply steady pressure while turning the screwdriver in the clockwise direction to tighten or counterclockwise to loosen the screw.
- Avoid using excessive force to prevent damaging the screw or the bit.

4. After Use:

- Remove the bit from the screwdriver by pressing the release mechanism.
- Clean the bits after use to remove any debris or residue.

Disposal Instructions

- Dispose of any damaged or worn bits according to local regulations.
- Do not dispose of bits in regular household waste if they are considered hazardous.
- Consider recycling options for metal components where applicable.
