[Gunsmith Tools & Supplies](#) > [General Gunsmith Tools](#) > [Screwdrivers & Sets](#) > [Magna-Tip Bits](#)

**BROWNELLS ANTI-CAM-OUT PHILLIPS BITS** The Brownells Anti-Cam-Out Phillips Bits are precision-engineered tools designed to provide gunsmiths and firearm enthusiasts with enhanced control and reduced risk of screw damage during firearm maintenance and assembly. These bits feature a unique anti-cam-out design that minimizes the tendency of Phillips screws to slip out of the driver under torque, ensuring secure engagement and efficient torque application. Crafted from high-quality materials, these bits offer durability and long-lasting performance, making them a valuable addition to any gunsmith's toolkit. Key Features: Anti-Cam-Out Design: Specially engineered to prevent the driver from slipping out of the screw head under torque, reducing the risk of cam-out and potential damage to screws. Precision Fit: Designed to provide a snug fit in Phillips screw heads, ensuring efficient torque transfer and minimizing wear on both the screw and the bit. Durable Construction: Made from high-quality materials to withstand the demands of repeated use in firearm maintenance and assembly. Specifications: Bit Type: Phillips Anti-Cam-Out Compatibility: Designed for use with Brownells Magna-Tip® handles and other compatible driver handles. Material: High-quality steel for durability and long service life. Customer Insights: Our customers appreciate the Brownells Anti-Cam-Out Phillips Bits for their ability to maintain a secure grip on Phillips screws during firearm maintenance tasks. The anti-cam-out design is particularly valued for preventing slippage and reducing the likelihood of screw head damage, which is a common concern when working with standard Phillips bits. The durable construction of these bits ensures they can withstand the rigors of regular use, making them a reliable choice for both professional gunsmiths and firearm enthusiasts. Incorporating the Brownells Anti-Cam-Out Phillips Bits into your toolkit enhances your ability to perform precise and secure screw engagements during firearm maintenance and assembly. Their specialized design and robust construction make them an essential tool for achieving professional results while preserving the integrity of your firearms.

## Attributes

- Name: [MAGNA-TIP ANTI-CAM PHILLIPS BIT SET OF 3](#)
- Manufacturer: [BROWNELLS](#)
- Product no.: 080441000
- Mfr. No.:
- Bit Number: D1221XXR,D1223XXR,D1222XXR
- Color: Steel
- Kit: Full
- Material: Steel
- Model Number: Set of All 3 Bits
- Style: Phillips
- Delivery weight: 0.018kg
- Shipping width: 83mm
- Shipping length: 146mm
- UPC: 050806008816

# Safety Instruction Guide for Brownells AntiCamOut Phillips Bits

## Introduction

Thank you for choosing the Brownells AntiCamOut Phillips Bits. These precision engineered tools are designed to enhance your firearm maintenance experience while ensuring safety and efficiency. This guide provides essential safety instructions, usage precautions, and disposal guidelines to help you use these bits effectively.

## General Safety Guidelines

- Ensure safe use of the product according to the manufacturer's instructions.
- Be aware of potential hazards associated with using hand tools, including sharp edges and the risk of injury.
- Always inspect the bits for damage before use. Do not use if they are worn or damaged.
- Keep the bits out of reach of children and vulnerable individuals.
- Use in a welllit area to maintain visibility during use.
- Store the bits in a safe and dry place when not in use.

## Specific Safety Precautions for Use

- Always wear appropriate personal protective equipment (PPE) such as safety goggles and gloves when using the bits.
- Ensure that the driver handle is securely attached to the bit before use.
- Use the bits only with compatible driver handles, specifically designed for Brownells MagnaTip® system.
- Do not apply excessive force while driving screws, as this may lead to camout or damage to the screw head.
- Avoid using the bits on screws that are overtightened or rusted, as this may cause slippage.
- Do not modify the bits in any way, as this may compromise their safety and effectiveness.

## Instructions for Installation and Usage

### 1. Selecting the Right Bit:

- Choose the appropriate size from the set (D1221XXR, D1222XXR, D1223XXR) based on the screw you are working with.

### 2. Attaching the Bit:

- Insert the selected bit into a compatible Brownells MagnaTip® handle.
- Ensure that the bit is fully seated in the handle before use.

### 3. Using the Bit:

- Position the bit over the screw head and apply gentle downward pressure.
- Rotate the driver handle slowly to engage the screw.
- Increase torque gradually, ensuring the bit remains securely engaged in the screw head.
- If you encounter resistance, stop and reassess the situation rather than forcing the bit.

### 4. Removing the Bit:

- Once the screw is installed or removed, gently pull the bit out of the screw head.
- Clean the bit after use to remove any debris or residue.

## Disposal Instructions

- Dispose of the bits responsibly according to local regulations.
- If the bits are damaged or worn out, do not attempt to repair them. Instead, dispose of them in a manner that prevents injury to others.
- Consider recycling options for steel materials where available.

## Contact Information for Further Support

For any safety inquiries or concerns regarding the Brownells AntiCamOut Phillips Bits, please refer to the contact information provided on the product packaging or the manufacturer's website.

By following the safety instructions outlined in this guide, you can ensure a safer and more effective experience with your Brownells AntiCamOut Phillips Bits. Thank you for prioritizing safety in your firearm maintenance activities.
