

ANTI-CAM-OUT PHILLIPS BITS - MAGNA-TIP ANTI-CAM PHILLIPS #1 BIT

[Gunsmith Tools & Supplies](#) > [General Gunsmith Tools](#) > [Screwdrivers & Sets](#) > [Magna-Tip Bits](#)

BROWNELLS ANTI-CAM-OUT PHILLIPS BITS The Brownells Anti-Cam-Out Phillips Bits are precision-engineered tools designed to provide gunsmiths and firearm enthusiasts with enhanced control and reduced risk of screw damage during firearm maintenance and assembly. These bits feature a unique anti-cam-out design that minimizes the tendency of Phillips screws to slip out of the driver under torque, ensuring secure engagement and efficient torque application. Crafted from high-quality materials, these bits offer durability and long-lasting performance, making them a valuable addition to any gunsmith's toolkit. Key Features: Anti-Cam-Out Design: Specially engineered to prevent the driver from slipping out of the screw head under torque, reducing the risk of cam-out and potential damage to screws. Precision Fit: Designed to provide a snug fit in Phillips screw heads, ensuring efficient torque transfer and minimizing wear on both the screw and the bit. Durable Construction: Made from high-quality materials to withstand the demands of repeated use in firearm maintenance and assembly. Specifications: Bit Type: Phillips Anti-Cam-Out Compatibility: Designed for use with Brownells Magna-Tip® handles and other compatible driver handles. Material: High-quality steel for durability and long service life. Customer Insights: Our customers appreciate the Brownells Anti-Cam-Out Phillips Bits for their ability to maintain a secure grip on Phillips screws during firearm maintenance tasks. The anti-cam-out design is particularly valued for preventing slippage and reducing the likelihood of screw head damage, which is a common concern when working with standard Phillips bits. The durable construction of these bits ensures they can withstand the rigors of regular use, making them a reliable choice for both professional gunsmiths and firearm enthusiasts. Incorporating the Brownells Anti-Cam-Out Phillips Bits into your toolkit enhances your ability to perform precise and secure screw engagements during firearm maintenance and assembly. Their specialized design and robust construction make them an essential tool for achieving professional results while preserving the integrity of your firearms.

Attributes

- Name: [MAGNA-TIP ANTI-CAM PHILLIPS #1 BIT](#)
- Manufacturer: [BROWNELLS](#)
- Product no.: 080441001
- Mfr. No.: D1221XXR
- Bit Number: D1221XXR
- Blade Thickness: .250
- Color: -
- Handle: No Handle
- Kit: -
- Material: -
- Model Number: #1 Bit Only
- Style: Phillips
- Delivery weight: 0.005kg
- Shipping width: 83mm
- Shipping length: 146mm
- UPC: 050806008823

Safety Instruction Guide for Brownells AntiCamOut Phillips Bits

Introduction

Thank you for choosing the Brownells AntiCamOut Phillips Bits. These precision engineered tools are designed to enhance your experience in firearm maintenance and assembly. This safety instruction guide provides essential information to ensure safe use, proper handling, and maintenance of the product in compliance with the EU General Product Safety Regulation (GPSR).

General Safety Guidelines

- Ensure that the product is used only for its intended purpose, which is to drive Phillips screws in firearm maintenance and assembly.
- Always inspect the bits for any signs of damage or wear before use. Do not use damaged bits.
- Keep the bits out of reach of children and ensure they are used only by individuals who understand their proper use.
- Store the bits in a dry place to prevent rust and corrosion.
- Use appropriate personal protective equipment (PPE), such as safety glasses, when using the bits to protect against potential debris.

Specific Safety Precautions for Use

• Hazard Identification:

- Risk of slipping: The anticamout design minimizes slipping; however, improper use may still lead to accidents.
- Risk of injury: Using the bits with excessive force can lead to breakage and potential injury.

• Avoiding Hazards:

- Always ensure a firm grip on the handle when using the bits.
- Do not apply excessive torque that exceeds the recommended limits for the screws being used.
- Avoid using the bits in wet or slippery conditions to maintain control and prevent accidents.
- Do not modify the bits in any way, as this may compromise their integrity and safety.

Instructions for Installation and Usage

1. Preparation:

- Select the appropriate bit size for the Phillips screw you are working with. The Brownells AntiCamOut Phillips #1 Bit is specifically designed for #1 Phillips screws.
- Ensure that your driver handle is compatible with the MagnaTip® system.

2. Installation:

- Insert the bit into the driver handle until it is securely locked in place.
- Check that the bit is properly seated in the driver handle before use.

3. Usage:

- Align the bit with the screw head and apply gentle pressure to engage the bit with the screw.
- Turn the driver handle clockwise to drive the screw into the material.

- If resistance is met, stop and assess the situation. Do not force the screw, as this may damage the screw head or the bit.
- After use, remove the bit from the screw and clean any debris from the bit and handle.

Disposal Instructions

- Dispose of any damaged or worn bits in accordance with local regulations for metal waste.
- Do not throw bits in regular household waste. Check with local waste management for proper disposal methods.
- Recycle the bits if possible, as they are made from highquality steel.

Contact Information for Further Support

For any safety inquiries or concerns regarding the Brownells AntiCamOut Phillips Bits, please refer to the EUbased contact provided with your product packaging or documentation.

By following these guidelines, you can ensure a safe and effective experience with your Brownells AntiCamOut Phillips Bits. Thank you for your attention to safety and for choosing our product.
