## Shop-Proven Premium-Grade Polish For The Professional

The answer to a gun polisher's dream! Made to the highest standards of quality with carefully screened, true-sized grits for reliable, repeatable results and a natural, greaseless base that doesn't leave a residue to mess up bluing or plating jobs. Packed in a formed, flexible plastic tube to stay fresh between uses. 1) Unlike hard drying abrasives, Polish-O-Ray® sets up to a medium soft surface without flinty hard flakes which, regardless of grit size being used, can do serious damage to a polished surface. 2) It is easily applied to polishing wheels without stopping the motor. Simply press the open end of the tube to your wheel; the polish adheres to the moving surface, hardens in a few seconds and is ready for use. 3) Because of its softer nature, a true, ripple-free surface is quickly obtained on all wheels. The best possible polished surface, free from ripples and bounce marks, is your assurance of a superior, professional refinishing job. Polish-O-Ray® does this for you. 4) Polish-O-Ray® has been used by gunsmiths, metal finishers, and aircraft manufacturers since the early 1940's. Wherever a quality surface, free from chatter marks, scratch marks and imperfections is required, the use of Polish-O-Ray® is a MUST. One precision manufacturer in the southeast orders by the keg. And, where else but on a gun does a perfect finish draw more praise and admiration? These beautiful finishes are the reason for Polish-O-Ray®'s continuing popularity among our country's gunsmiths and serious hobbyists. By following the "Master Metal Polisher's" technique, it is possible to obtain a top quality finishing job in a minimum of time with P-O-R®. Complete instructions are in our Bluing Instruction Booklet (#076-200-135) and the book Gunsmith Kinks™. It consists; mainly, of starting with the coarsest grit and polishing the surface in one direction; then, with the next finer grit on a different wheel polishing at 45° angles to the first "pass". By following this procedure down through the finer grit numbers, the final surface is unequaled for quality and perfection. Polish-O-Ray® is shipped in a resealable outer bag. Put the tube back in the bag, seal with a twist tie and ALWAYS store all your Polish-O-Ray® - brand new or partially used - in the refrigerator for longest life.

# PolishORay® 320 Grit PolishORay Safety Instruction Guide

## Introduction

Thank you for choosing PolishORay® 320 Grit PolishORay. This product is designed to provide a superior polishing experience for gunsmiths, metal finishers, and hobbyists. To ensure safe and effective use, please read and follow the safety instructions outlined in this guide.

## General Safety Guidelines

- Always read the product label and safety information before use.
- Ensure the workspace is wellventilated to avoid inhalation of any dust or particles.
- Keep the product out of reach of children and vulnerable individuals.
- Use personal protective equipment (PPE) such as gloves and safety goggles when handling the product.
- Store the product in a cool, dry place away from direct sunlight and heat sources.
- Regularly check the product for any signs of damage or deterioration before use.

## Specific Safety Precautions for Use

- Avoid contact with skin and eyes. In case of contact, rinse thoroughly with water and seek medical attention if irritation persists.
- Do not ingest the product. If ingested, seek medical attention immediately.
- Use in accordance with the recommended application methods. Improper use can lead to surface damage or ineffective results.
- Do not mix with other chemicals or substances unless specified in the product instructions.
- If you experience any adverse reactions while using the product, discontinue use immediately and consult a medical professional.

## Instructions for Installation and Usage

### 1. Preparation:

- Ensure that the polishing wheel is clean and free from any debris.
- Gather all necessary PPE before starting the polishing process.

### 2. Application:

- Open the tube of PolishORay® and press the open end against the polishing wheel while it is in motion.
- Allow the polish to adhere to the wheel; it will harden in a few seconds.
- Use the polish in a single direction for the coarsest grit, then switch to a finer grit at a 45° angle for the next pass.
- Continue this process using progressively finer grits for optimal results.

### 3. PostUse:

- After polishing, clean the polishing wheel to remove any residual polish.
- Seal the tube of PolishORay® in the resealable outer bag and store in the refrigerator for longevity.

## Disposal Instructions

- Dispose of any unused or expired product in accordance with local regulations.
- Do not dispose of the product down the drain or in regular household waste.
- Check local guidelines for hazardous waste disposal if necessary.

## Contact Information for Further Support

For any safety inquiries or additional information regarding PolishORay®, please refer to the manufacturer's customer service or support resources. Always ensure that you are following the latest safety guidelines and product updates.

By following these safety instructions, you can ensure a safe and effective polishing experience with PolishORay® 320 Grit PolishORay. Thank you for your attention to safety!
