

SHOTGUN SIGHT KIT "A" - BROWNELLS SHOTGUN SIGHT REFILL SIGHTS #1 10 PACK

[Shotgun Parts](#) > [Sights](#) > [Sight Parts](#) > [Sight Refills](#)

Replacement Shotgun Beads

Brownells Shotgun Sight Kit "A" is truly one of the most unusual bargains ever offered a Sporting Goods Store or Professional Gunsmith in a practical, economical assortment of top-quality, replacement shotgun sights. The workmanship is superb, being done on the most modern and up-to-date machinery in the U.S.A. The sight globes are true spheres - not lop-sided as those you have found on many other sights at a higher price. The threads are cut onto the shank, and are clean, sharp and well-machined for the best possible fit. Shanks are threaded right up to the base of the bead so you can set the sight exactly onto the barrel. Your choice of sights in the Kit is extremely wide. There are 2 shank sizes, 3 bead sizes and 2 bead colors, giving you a total of 8 different sights to choose from so you can fit nearly any gun that comes into the shop. The two shank sizes are 3-56 and 6-48. Size 3-56 is one of the most widely used shanks in the industry and will fit most guns having threaded sight holes. The 6-48 shaft was chosen for the alternate size to be used when the original hole must be redrilled and tapped - or where there is no hole at all - because 6-48 is the firearm industry standard screw size, and every gunshop in the country will have the drill and tap on hand to make the new hole. Bead sizes are .067, .130 and .175, (the most popular sizes), giving your customer the choice of small, medium or large beads. In addition, each bead size is available in either Gold color - machined from finest brass; or White color - machined from high tensile aluminum alloy. Neither color will bleed at the heels, wear off with hard use, or chip and peel, as almost all enameled sights eventually do. Brownells Shotgun Sight Kit "A" comes to you very attractively displayed in a clear plastic counter case. Each individual sight number is in its own plainly identified box on a black tray. There are 10 sights of each number, giving you a total of 80 sights in the Kit - 40 Gold and 40 White - a complete inventory of top-quality shotgun sights with an absolute minimum of capital invested. Don't pass up the opportunity to cash-in on the shotgun sight replacement market. For an unbelievably low investment you can have a complete, correctly balanced and assorted inventory of 80 superb shotgun sights. Don't let yourself get caught short when you can have them on hand so easily. Order your Brownells Shotgun Sight Kit "A" today! Refill Sights for Kit "A" - Refills for the Shotgun Sight Kit "A" are single or 10-pak of sights of one number.

Brownells Shotgun Sight Kit "A" Safety Instruction Guide

Introduction

Thank you for choosing the Brownells Shotgun Sight Kit "A". This guide provides essential safety instructions to ensure the safe use and handling of the product. Please read this guide carefully before using the kit to maximize safety and performance.

General Safety Guidelines

- Always handle the shotgun sight kit with care to avoid injury or damage.
- Ensure that all components are inspected for defects before use.
- Follow all local laws and regulations regarding the use and installation of firearm accessories.
- Keep the kit out of reach of children and unauthorized persons.
- In case of any safety concerns, report them to the relevant authorities.

Specific Safety Precautions for Use

- Use only the specified shank sizes (356 and 648) for your firearm to ensure proper fit and safety.
- Do not attempt to modify the sights or their components, as this may compromise safety and functionality.
- Avoid using the kit in adverse weather conditions that may affect visibility or handling.
- Always wear appropriate safety gear, such as eye protection, when installing or handling the sights.
- Be cautious of sharp edges on the sights and components during handling.

Instructions for Installation and Usage

1. Preparation:

- Ensure that the firearm is unloaded and pointed in a safe direction.
- Gather all necessary tools for installation, including a suitable drill and tap if needed.

2. Choosing the Right Sight:

- Select the appropriate shank size based on your firearm's threaded sight holes.
- Choose a bead size and color that best suits your shooting needs.

3. Installation:

- If redrilling is necessary, use the 648 shank size to create a new hole, as it is the industry standard.
- Carefully thread the sight onto the barrel, ensuring a snug fit without overtightening.
- Verify that the sight is aligned correctly for optimal accuracy.

4. PostInstallation Check:

- Inspect the installation to ensure that the sight is secure and properly aligned.
- Test the sight by aiming at a target to confirm visibility and accuracy.

Disposal Instructions

- Dispose of any defective or unused components responsibly, following local regulations for hazardous materials.

- Do not throw the product in the general waste; instead, consider recycling options where available.

Contact Information for Further Support

For any inquiries regarding safety or product information, please reach out to the designated support channels available in your region.

By following these safety instructions, you can ensure a safe and effective experience with the Brownells Shotgun Sight Kit "A". Thank you for your attention to safety and responsible firearm handling.
