Slotted-Head Screws For All Scope & Sight Mounting Jobs

This Kit has been extremely popular with our customers for many years. The gunsmiths and dealers who do any type of sight work have found that they do not like to be without it. The slotted-head screws included in the kit cover at least 99% of all scope and iron sight mounting requirements. The Screw Kit is packed in a plastic box and contains 12 each of the most popular 18 screw sizes needed when working with scopes or sights. It also has a pair of chrome-plated tweezers with flat jaws for easily picking up the right screw and our handy, Checker/Shortener Jig that makes grinding screws to the right length fast and easy. The screws are made of high strength, forged tool steel, feature slotted-heads and are tempered and blued to rigid specifications. We suggest that should a screw need to be cut and fitted, it should be treated with rust-prohibitive OXPHO-BLUE™ before it is used to give it a highly rust-resistant, tough, blue coat to make your job look and wear better. The kit is available to you at a very substantial savings over the cost of buying the screws singly. It is an opportunity to have just the right, hard-to-find sight base screw when you need it, for only a minimal cost ... an advantage that will pay for itself time after time in repair or installation jobs.

Introduction

Thank you for choosing the SIGHT BASE SCREW KIT BROWNELLS. This guide provides essential safety instructions and usage information to ensure the safe handling and installation of the product. Please read this guide carefully to understand how to use the screws safely and effectively.

General Safety Guidelines

- Ensure that all tools and components are used according to the manufacturer's instructions.
- Keep the product out of reach of children and vulnerable individuals.
- Inspect the screws and tools for any visible damage before use.
- Store the kit in a dry and safe place to prevent accidental injuries.
- Do not use the screws for purposes other than intended.

Specific Safety Precautions for Use

- Always wear appropriate safety gear, including safety goggles and gloves, when handling screws and tools.
- Avoid using damaged screws or tools, as they may pose a risk of injury.
- Be cautious when grinding screws to the desired length to prevent cuts or injuries.
- Ensure that the workspace is clean and free from hazards that may cause accidents.
- Do not apply excessive force when installing screws, as this may lead to breakage or injury.

Instructions for Installation and Usage

1. Preparation:

- Gather all necessary tools, including the SIGHT BASE SCREW KIT, tweezers, and Checker/Shortener Jig.
- Ensure your workspace is welllit and organized.

2. Selecting the Right Screw:

- Use the tweezers provided to select the appropriate screw size for your sight installation.
- Refer to the screw sizes included in the kit to determine the best fit for your application.

3. Cutting Screws (if necessary):

- If a screw needs to be cut, use the Checker/Shortener Jig for precision.
- Treat the cut screw with rustprohibitive OXPHOBLUE™ to enhance corrosion resistance.

4. Installation:

- Align the sight base with the mounting surface.
- Insert the selected screw into the mounting hole.
- Use a screwdriver to gently tighten the screw, ensuring it is secure but not overtightened.

5. Final Inspection:

- After installation, doublecheck that all screws are properly tightened and secure.
- Ensure that the sight is correctly aligned and functioning as intended.

Disposal Instructions

- Dispose of any unused or damaged screws in accordance with local regulations.
- Recycle packaging materials where possible.
- Do not dispose of screws in general waste if they are potentially hazardous.
