## **Slotted-Head Screws For All Scope & Sight Mounting Jobs**

This Kit has been extremely popular with our customers for many years. The gunsmiths and dealers who do any type of sight work have found that they do not like to be without it. The slotted-head screws included in the kit cover at least 99% of all scope and iron sight mounting requirements. The Screw Kit is packed in a plastic box and contains 12 each of the most popular 18 screw sizes needed when working with scopes or sights. It also has a pair of chrome-plated tweezers with flat jaws for easily picking up the right screw and our handy, Checker/Shortener Jig that makes grinding screws to the right length fast and easy. The screws are made of high strength, forged tool steel, feature slotted-heads and are tempered and blued to rigid specifications. We suggest that should a screw need to be cut and fitted, it should be treated with rust-prohibitive OXPHO-BLUE™ before it is used to give it a highly rust-resistant, tough, blue coat to make your job look and wear better. The kit is available to you at a very substantial savings over the cost of buying the screws singly. It is an opportunity to have just the right, hard-to-find sight base screw when you need it, for only a minimal cost ... an advantage that will pay for itself time after time in repair or installation jobs.

## **Specific Safety Precautions for Use**

- Handle screws carefully to avoid injury from sharp edges.
- Use tweezers provided in the kit to pick up and manipulate screws, reducing the risk of finger injuries.
- When cutting or grinding screws, wear safety goggles to protect your eyes from metal shavings.
- Ensure your workspace is clean and organized to prevent accidents.
- Do not use damaged screws or tools, as they may pose safety hazards.
- Always treat cut screws with rustprohibitive OXPHOBLUE™ to enhance durability and safety.

## **Instructions for Installation and Usage**

### **1. Preparation:**

- Gather all necessary tools and materials before starting the installation.
- Ensure your work area is welllit and free from distractions.

### **2. Using the Screws:**

- Select the appropriate screw size from the kit based on your mounting requirements.
- Use the chromeplated tweezers to pick up the screw for installation.
- Align the screw with the mounting hole and apply gentle pressure while turning it clockwise.

### **3. Cutting Screws:**

- If a screw needs to be cut, use the Checker/Shortener Jig included in the kit for accurate length adjustments.
- After cutting, treat the screw with OXPHOBLUE™ to prevent rust.

### **4. Final Checks:**

- Once all screws are installed, doublecheck each one to ensure they are secure.
- Avoid overtightening screws as this may damage the sight or the firearm.

## **Disposal Instructions**

- Dispose of any unused or damaged screws in accordance with local regulations.
- Do not throw screws in regular household waste; instead, use designated recycling or hazardous waste facilities if applicable.
