

1911 STOCK SCREWS - 1911 STANDARD STOCK SCREWS BLUED 4 PACK

[Handgun Parts](#) > [Frame Parts](#) > [Frame Hardware](#) > [Frame Screws](#)

Made to Original Factory Specs For Easy Replacement

The 1911 Government model auto is about as rugged as a mountain mule, but when you take the grips off to polish and reblue the critter or put on another set of grips, chances are that at least one of the stock screws will need replacing. Standard Stock Screws - Nicely made and finished, these special-sized, blued screws are packed in sets of 4 Screws. Stainless Steel (S/S) Stock Screws - Look "right" on stainless steel and nickel-plated guns.

Safety Instruction Guide for 1911 Stock Screws

Introduction

Thank you for choosing the 1911 Standard Stock Screws. This guide provides essential safety instructions and information to ensure the safe use and installation of the product. Please read this guide carefully before use to avoid any potential hazards.

General Safety Guidelines

- Ensure that the product is suitable for your specific firearm model (Government, Commander, Officers).
- Always inspect the stock screws for any signs of damage or wear before installation.
- Keep the product out of reach of children and vulnerable individuals.
- Follow all local laws and regulations regarding firearm modifications and accessories.
- Report any unsafe products or accidents to the appropriate authorities.

Specific Safety Precautions for Use

- Use only the specified stock screws for your firearm model to prevent malfunction or damage.
- Do not exceed the recommended torque specifications when installing screws to avoid stripping threads.
- Always wear appropriate safety gear, such as safety glasses, when working on firearms.
- Ensure that the firearm is unloaded and in a safe condition before beginning any work.
- If you are unsure about the installation process, consult a qualified gunsmith.

Instructions for Installation and Usage

1. Preparation

- Ensure your workspace is clean and free of distractions.
- Gather all necessary tools, including a screwdriver suitable for the screws being used.

2. Removing Old Screws

- Carefully remove the grips from the firearm using the appropriate screwdriver.
- Unscrew the old stock screws gently, taking care not to damage surrounding components.

3. Installing New Screws

- Align the new stock screws with the holes in the grip and the frame of the firearm.
- Handtighten the screws initially to ensure proper alignment.
- Using the screwdriver, tighten the screws to the manufacturer's recommended torque specifications.
- Reattach the grips securely.

4. Final Inspection

- Check that all screws are tightened properly and that the grips are securely in place.
- Test the firearm function to ensure everything operates correctly.

Disposal Instructions

- Dispose of any damaged or unusable stock screws in accordance with local regulations.
- Do not dispose of screws in a manner that could pose a hazard to the environment or public safety.

Contact Information for Further Support

For any questions or concerns regarding the use of this product, please refer to the manufacturer's contact details provided separately. Always seek assistance from qualified professionals if you are uncertain about any aspect of installation or usage.

Conclusion

By following these safety instructions, you can ensure the safe and effective use of the 1911 Standard Stock Screws. Always prioritize safety and compliance with local laws when handling firearms and their components. Thank you for your attention to these important guidelines.
