# Safety Instruction Guide for BARREL/RECEIVER TAPS

## Introduction

Thank you for choosing the Brownells Barrel/Receiver Taps. These tools are designed to help gunsmiths and firearm enthusiasts restore and clean damaged threads on barrels and receivers. For your safety and optimal performance, please read and follow the guidelines outlined in this document carefully.

## General Safety Guidelines

- Ensure that you are familiar with the operation and maintenance of firearms before using this product.
- Always wear appropriate personal protective equipment (PPE) such as safety glasses and gloves when using the taps.
- Keep the taps out of reach of children and vulnerable individuals to prevent accidents.
- Regularly inspect the taps for any signs of wear or damage before each use.
- Follow all local laws and regulations regarding the use and handling of firearms and gunsmithing tools.

## Specific Safety Precautions for Use

- **Handling:** Always handle the taps with care. Avoid dropping or mishandling them to prevent damage.
- **Work Environment:** Ensure your workspace is clean, welllit, and organized to reduce the risk of accidents.
- **Thread Compatibility:** Verify that the tap size matches the thread size of the barrel or receiver you are working on. Using the wrong size can lead to further damage.
- **Lubrication:** Use appropriate cutting oil or lubricant when using the taps to ensure smooth operation and prevent overheating.
- **Force Application:** Do not apply excessive force when using the taps. If you encounter resistance, stop and reassess the situation to avoid damaging the threads.

## Instructions for Installation and Usage

### 1. Preparation:

- Gather all necessary tools and materials, including the appropriate tap, cutting oil, and a tap wrench.
- Clean the area around the damaged threads to remove any debris or contaminants.

### 2. Selecting the Right Tap:

- Choose the correct tap size based on the specifications provided:
  - Large Ring Mauser: 1.10"12 TPI
  - FN FAL: 1"16 TPI
  - Remington 700 and XP100: 1 1/16"16 TPI
  - Savage 110/112: 1.055"20 TPI

### 3. Tapping Process:

- Apply a small amount of cutting oil to the tap.
- Insert the tap into the thread hole and align it carefully.
- Turn the tap handle clockwise to begin cutting the threads. Apply gentle and even pressure.
- After a few turns, back the tap out slightly to clear any debris. Repeat this process until the tap has fully cut the threads.

#### **4. PostInstallation:**

- Once the threads are restored, clean the area again to remove any metal shavings or excess oil.
- Inspect the threads to ensure they are clean and properly cut.

## **Disposal Instructions**

- Dispose of any damaged or worn taps in accordance with local regulations.
- Do not dispose of taps in regular household waste. Check with your local waste management facility for proper disposal methods.

## **Contact Information for Further Support**

For any safety inquiries or additional support regarding the use of the Brownells Barrel/Receiver Taps, please reach out to your local distributor or manufacturer. Always ensure you have the latest information and resources to maintain safety while using your tools.

By following these guidelines, you can ensure a safe and effective experience while using the Brownells Barrel/Receiver Taps. Thank you for prioritizing safety in your firearms maintenance and repair activities.
