Silicon Carbide Abrasive Balls For Flawless "Inside" Polishing On Revolvers & Semi- Auto Pistols

BROWNELLS CYLINDER POLISHING SYSTEM The Brownells Cylinder Polishing System is a specialized tool designed to smooth and polish rough or scored revolver chambers, enhancing extraction efficiency and overall firearm performance. By eliminating imperfections within the cylinder, this system ensures a friction-free surface, thereby reducing the likelihood of extraction issues during operation. **Description and Features:** This polishing system utilizes medium and fine grit silicon carbide abrasives embedded in twisted steel shafts, providing effective material removal and a polished finish. The hones are 3 inches in length, making them suitable for various revolver calibers, including .32, .38/.357, .41, .44, .45 ACP, and .45 Colt. Additionally, the system can be employed to remove machine marks on semi-automatic pistol spring "ways," resulting in smoother hammer falls and improved cycling. For optimal performance and longevity of the hones, it is recommended to use them with Flex-Hone oil. **Specifications:** Abrasive Material: Silicon carbide Grit Options: Medium and fine Shaft Material: Twisted steel Hone Length: 3 inches Compatible Calibers: .32, .38/.357, .41, .44, .45 ACP, .45 Colt Customer Insights: Customers of the Brownells Cylinder Polishing System commend its effectiveness in resolving extraction problems by providing a smooth, polished chamber surface. The ease of use and quick results are frequently highlighted, with many noting significant improvements in firearm performance after application. The system's versatility in accommodating various calibers and its ability to enhance semi-automatic pistol operation by smoothing spring "ways" are also appreciated. Incorporating the Brownells Cylinder Polishing System into your gunsmithing toolkit ensures efficient and thorough polishing of revolver chambers and semi-automatic pistol components, leading to enhanced reliability and performance of your firearms.

Attributes

Brownell's Cylinder Polishing System Safety Instructions

Introduction

Thank you for choosing the Brownell's Cylinder Polishing System. This specialized tool is designed to enhance the performance of your firearm by smoothing and polishing revolver chambers. To ensure safe and effective use, please read and follow these safety instructions carefully.

General Safety Guidelines

- Always use the polishing system in accordance with the manufacturer's instructions.
- Ensure that the area where you are working is wellventilated and free of flammable materials.
- Keep the polishing system out of reach of children and unauthorized users.
- Inspect the polishing hones for any signs of damage before each use. Do not use damaged hones.
- Wear appropriate personal protective equipment (PPE), including safety goggles and gloves, to protect against dust and debris.
- Store the polishing system in a dry, secure location when not in use.

Specific Safety Precautions for Use

- Ensure that the firearm is unloaded and the chamber is clear before using the polishing system.
- Do not apply excessive pressure when using the hones, as this can cause damage to the firearm or the hones.
- Use the polishing system only on compatible calibers as specified in the product description.
- Avoid using the polishing system on any parts of the firearm that are not intended for polishing, such as the barrel or trigger assembly.
- Always follow the recommended procedures for applying FlexHone oil to ensure optimal performance and longevity of the hones.
- If you experience any difficulties or irregularities during use, discontinue use immediately and consult the product manual or a qualified gunsmith.

Instructions for Installation and Usage

1. Preparation:

- Gather all necessary tools and materials, including the Brownell's Cylinder Polishing System and FlexHone oil.
- Ensure the workspace is clean and organized.

2. Using the Polishing System:

- Confirm that your firearm is unloaded and the chamber is clear.
- Select the appropriate hone based on the caliber of your firearm.
- Apply a small amount of FlexHone oil to the hone to facilitate smooth operation.
- Insert the hone into the chamber and gently rotate it while applying light pressure. Do not force the hone.
- Continue polishing until the desired smoothness is achieved, checking frequently to avoid overpolishing.
- After use, clean the hone and store it properly.

3. PostUsage Inspection:

- Inspect the polished chamber for any remaining imperfections.
- Ensure that all tools are cleaned and stored safely.

Disposal Instructions

- Dispose of any used hones and FlexHone oil in accordance with local regulations.
- Do not dispose of hones in regular household waste. Check with local waste management authorities for proper disposal methods.

Contact Information for Further Support

For any safety inquiries or support, please refer to the contact information provided with the product packaging or visit the manufacturer's website.

By following these safety instructions, you can ensure a safe and effective experience with the Brownell's Cylinder Polishing System. Thank you for your attention to safety!
