Silicon Carbide Abrasive Balls For Flawless "Inside" Polishing On Revolvers & Semi- Auto Pistols

BROWNELLS CYLINDER POLISHING SYSTEM The Brownells Cylinder Polishing System is a specialized tool designed to smooth and polish rough or scored revolver chambers, enhancing extraction efficiency and overall firearm performance. By eliminating imperfections within the cylinder, this system ensures a friction-free surface, thereby reducing the likelihood of extraction issues during operation. **Description and Features:** This polishing system utilizes medium and fine grit silicon carbide abrasives embedded in twisted steel shafts, providing effective material removal and a polished finish. The hones are 3 inches in length, making them suitable for various revolver calibers, including .32, .38/.357, .41, .44, .45 ACP, and .45 Colt. Additionally, the system can be employed to remove machine marks on semi-automatic pistol spring "ways," resulting in smoother hammer falls and improved cycling. For optimal performance and longevity of the hones, it is recommended to use them with Flex-Hone oil. **Specifications:** Abrasive Material: Silicon carbide Grit Options: Medium and fine Shaft Material: Twisted steel Hone Length: 3 inches Compatible Calibers: .32, .38/.357, .41, .44, .45 ACP, .45 Colt **Customer Insights:** Customers of the Brownells Cylinder Polishing System commend its effectiveness in resolving extraction problems by providing a smooth, polished chamber surface. The ease of use and quick results are frequently highlighted, with many noting significant improvements in firearm performance after application. The system's versatility in accommodating various calibers and its ability to enhance semi-automatic pistol operation by smoothing spring "ways" are also appreciated. Incorporating the Brownells Cylinder Polishing System into your gunsmithing toolkit ensures efficient and thorough polishing of revolver chambers and semi-automatic pistol components, leading to enhanced reliability and performance of your firearms.

Attributes

Safety Instruction Guide for Brownell's Cylinder Polishing System

Introduction

Thank you for choosing the Brownell's Cylinder Polishing System. This specialized tool is designed to enhance the performance of your revolver by polishing and smoothing the cylinder chambers. To ensure safe and effective use of this product, please read and follow the safety instructions outlined in this guide.

General Safety Guidelines

- Always use the Brownell's Cylinder Polishing System in accordance with the instructions provided in this guide.
- Ensure that the work area is clean, welllit, and free from distractions.
- Keep the polishing system out of reach of children and unauthorized users.
- Wear appropriate personal protective equipment (PPE) such as safety glasses and gloves when using the product.
- Regularly inspect the polishing hones for wear and damage before use. Do not use damaged hones.
- Store the polishing system in a dry and safe location when not in use.

Specific Safety Precautions for Use

- Do not exceed the recommended usage time for the polishing hones to avoid overheating and potential damage.
- Avoid using the polishing system on any materials other than specified calibers to prevent injury or damage.
- Ensure the firearm is unloaded and safe before beginning the polishing process.
- Use FlexHone oil as recommended to ensure optimal performance and reduce the risk of damage to the hones.
- Follow all local laws and regulations regarding the use and modification of firearms.

Instructions for Installation and Usage

1. Preparation:

- Gather the necessary tools and materials, including the Brownell's Cylinder Polishing System and FlexHone oil.
- Ensure that your workspace is organized and free of clutter.

2. Using the Polishing System:

- Select the appropriate hone for your revolver caliber (e.g., .32, .38/.357, .41, .44, .45 ACP, .45 Colt).
- Apply a small amount of FlexHone oil to the polishing hone.
- Insert the hone into the revolver chamber and begin polishing with a gentle, consistent motion.
- Do not apply excessive pressure; let the abrasives do the work.
- Periodically remove the hone to check for material removal and ensure a smooth finish.
- After polishing, clean the chamber thoroughly to remove any residue from the polishing process.

3. PostUsage Care:

- Clean the polishing hones after each use to maintain their effectiveness and longevity.
- Store the hones in a protective case to avoid damage.

Disposal Instructions

- Dispose of any worn or damaged polishing hones in accordance with local regulations.
- Do not dispose of the product in regular household waste. Check with local waste management authorities for proper disposal methods.

Contact Information for Further Support

For any safety inquiries or support regarding the Brownell's Cylinder Polishing System, please refer to the manufacturer's contact information as provided on the product packaging or the official website.

By following these safety guidelines and instructions, you can ensure a safe and effective experience with the Brownell's Cylinder Polishing System. Thank you for prioritizing safety and performance in your firearms maintenance.
