

REVOLVER RANGE RODS - REVOLVER RANGE ROD HEAD FOR .44/44 MAGNUM

[Gunsmith Tools & Supplies](#) > [Handgun Tools](#) > [Alignment Tools](#) > [Range Rods](#)

Tells Instantly If Barrel & Cylinder Are In Perfect Alignment-Match & Service Grade Available

Lets you know instantly if a revolver barrel and cylinder are in perfect alignment and if cylinder crane or yoke has been sprung, thus throwing axis of each out of line with axis of barrel bore . . . for timing - "accuracy jobs" . . . locating cause of lead splatter . . . professional service inspections. An excellent tool to use when demonstrating to a customer "why"! The handle with knurled grip end is threaded to take any of the interchangeable heads, with sizes carefully selected to indicate very small misalignments. The .38 caliber heads are available in two diameters, one for Match guns that must be dead on for best performance and one for Service guns which aren't always thoroughly clean and don't have to meet quite as fine an accuracy standard. And, there's a special head for the S&W K-22 which has a slightly undersized bore.

Safety Instruction Guide for REVOLVER RANGE RODS

Introduction

Thank you for choosing the REVOLVER RANGE RODS. This product is designed to assist in ensuring the proper alignment of revolver barrels and cylinders. Please read this safety instruction guide carefully to ensure safe and effective use of the product.

General Safety Guidelines

- Always handle the REVOLVER RANGE RODS with care to prevent accidents and injuries.
- Ensure that the product is used only for its intended purpose.
- Keep the product out of reach of children and vulnerable individuals.
- Inspect the product before each use for any signs of damage or wear.
- Report any unsafe products or accidents to the appropriate authorities.

Specific Safety Precautions for Use

- Always wear appropriate personal protective equipment (PPE) such as safety glasses when using the product.
- Ensure that the revolver is unloaded before using the RANGE RODS.
- Do not use the RANGE RODS if you notice any damage to the heads or handle.
- Use the correct interchangeable head for the caliber of the revolver being inspected.
- Do not force the RANGE RODS into the barrel or cylinder; ensure a proper fit to avoid damage.
- Avoid using the product in wet or damp conditions to prevent slipping or electrical hazards.

Instructions for Installation and Usage

1. Selecting the Correct Head:

- Choose the appropriate head size for your revolver caliber. The .44 caliber head is specifically designed for .44/44 Magnum revolvers.
- Ensure that the head is clean and free from debris before attachment.

2. Attaching the Head:

- Align the threaded end of the handle with the corresponding head.
- Turn the head clockwise until secure. Ensure it is firmly attached to prevent disconnection during use.

3. Using the RANGE RODS:

- Insert the RANGE RODS into the revolver barrel gently.
- Check for proper alignment by observing the fit of the head in the cylinder.
- If misalignment is detected, assess the cause and consult a professional if necessary.

4. PostUse Care:

- After use, remove the head from the handle and clean both components with a soft cloth.
- Store the RANGE RODS in a dry place, preferably in the fitted storage box to prevent damage.

Disposal Instructions

- Dispose of the product in accordance with local regulations regarding metal products.
- Do not dispose of the product in household waste. Instead, consider recycling options available in your area.

Contact Information for Further Support

For any safety inquiries or further assistance regarding the REVOLVER RANGE RODS, please reach out to the appropriate EU contact point for product safety.

By following these safety instructions, you can ensure not only your safety but also the effective use of the REVOLVER RANGE RODS. Thank you for your attention to these guidelines.
