

REVOLVER CYLINDER GAUGES - 60/66 REVOLVER CYLINDER GAUGE

[Gunsmith Tools & Supplies](#) > [Measuring Tools](#) > [Headspace Gauges](#)

GO/NO GO Headspace Gauges For Many Popular Revolvers

Easy-to-use, double-ended gauge quickly, accurately checks headspace on any .38/.357 revolver whose cylinder chambers are NOT recessed for the case rim. Works on Ruger S.A. and D.A. (60-66), S&W's (60-68) and others with same GO and NO GO specs. Too much headspace can cause misfires and/or ruptured cases; too little causes jamming.

Attributes

- Name: [60/66 REVOLVER CYLINDER GAUGE](#)
- Manufacturer: [BROWNELLS](#)
- Product no.: 080633666
- Mfr. No.:
- Material: Tool Steel

Safety Instruction Guide for REVOLVER CYLINDER GAUGES 60/66

Introduction

Thank you for choosing the REVOLVER CYLINDER GAUGES 60/66. This guide provides essential safety instructions and guidelines to ensure the safe and effective use of this product. Please read this manual thoroughly before using the product to understand the potential hazards and necessary precautions.

General Safety Guidelines

- **Product Safety:** Ensure that the gauge is used in accordance with the instructions provided. This product is designed for safe use with .38/.357 revolvers whose cylinder chambers are not recessed for the case rim.
- **Enhanced Recalls:** Stay informed about any recalls or safety notices related to this product. Follow the instructions provided in recall notices if applicable.
- **Online Shopping:** When purchasing online, ensure that you are using a reputable platform that complies with safety regulations.
- **Special Consumer Focus:** This product is not intended for use by children. Keep it out of reach of minors to prevent accidents.
- **EU Contact Point:** For any safety inquiries, please refer to the designated EU contact point for this product.
- **Rapid Alerts:** Monitor updates regarding product safety through the EU Safety Gate system.

Specific Safety Precautions for Use

- **Avoid Misuse:** Do not use the gauge for any purpose other than checking headspace on compatible revolvers.
- **Inspect Before Use:** Always inspect the gauge for any signs of damage or wear before use. Do not use if damaged.
- **Correct Usage:** Ensure that you are familiar with the correct method of using the gauge. Improper use may lead to inaccurate readings and potential safety hazards.
- **Handle with Care:** The gauge is made of hardened tool steel. Handle it carefully to avoid injury from sharp edges.
- **Store Safely:** After use, store the gauge in a safe location to prevent accidental injury or damage.

Instructions for Installation and Usage

1. Preparation:

- Ensure the revolver is unloaded and pointed in a safe direction.
- Gather the necessary tools and ensure a clean workspace.

2. Using the Gauge:

- Insert the appropriate end of the gauge into the cylinder chamber of the revolver.
- Check the fit:
 - If the gauge fits snugly, the headspace is within acceptable limits.
 - If the gauge does not fit, the headspace may be too tight or too loose, which could indicate a potential issue with the revolver.
- Repeat for each chamber to ensure consistent headspace across all chambers.

3. PostUse:

- Clean the gauge after use to remove any debris or residue.
- Store the gauge in its designated case or container to protect it from damage.

Disposal Instructions

- Dispose of the product in accordance with local regulations for metal products.
- Do not dispose of the gauge in regular household waste. Check with local authorities for appropriate disposal methods.

Contact Information for Further Support

For further assistance or inquiries regarding the safety and use of the REVOLVER CYLINDER GAUGES 60/66, please refer to the designated EU contact point for this product.

By following these guidelines, you can ensure the safe use of your REVOLVER CYLINDER GAUGES 60/66 and help prevent accidents. Thank you for your attention to safety!
