

BARREL VISE BUSHINGS - #14 M1 CARBINE ALUMINUM BARREL VISE BUSHING

[Gunsmith Tools & Supplies](#) > [General Gunsmith Tools](#) > [Vises & Accessories](#) > [Vise Accessories](#)

Extra Surface Area Gives Tremendous Power To Clamp Hold & Even The Tightest Barrel

Aluminum, split barrel bushings come in eight different hole sizes and one, special, pre-machined bushing to make this universal Barrel Vise system the very first choice of professional gunsmiths. Steel Bushings provide years of service, plus have the necessary clamping power to break loose the tightest barrels. Aluminium Bushings give exceptional holding ability without marking your barrel. Solid Bushings - Solid bushings that have NOT been split so you can alter them as you want.

Safety Instruction Guide for BARREL VISE BUSHINGS #14 M1 CARBINE ALUMINUM BARREL VISE BUSHING

Introduction

Thank you for choosing the BARREL VISE BUSHINGS #14 M1 CARBINE ALUMINUM BARREL VISE BUSHING. This guide provides important safety instructions and guidelines to ensure the safe and effective use of the product. Please read this document carefully before using the product.

General Safety Guidelines

- Ensure that the product is used only for its intended purpose as specified in the product specifications.
- Always wear appropriate personal protective equipment (PPE), such as safety glasses and gloves, when using the barrel vise bushings.
- Keep the product out of reach of children and vulnerable individuals to prevent accidents.
- Inspect the bushings for any signs of damage or wear before each use. Do not use damaged bushings.
- Follow all local regulations and guidelines regarding the use of tools and equipment.

Specific Safety Precautions for Use

- Use bushings that are appropriate for the specific barrel type and size to avoid slippage and potential injury.
- Ensure that the barrel is securely clamped before applying any force to prevent accidents.
- Do not exceed the recommended torque limits when tightening the bushings.
- Avoid using excessive force when loosening or tightening barrels to prevent damage to the bushing or barrel.
- Always work in a wellventilated area to avoid inhaling any fumes or debris generated during use.

Instructions for Installation and Usage

1. Selecting the Right Bushing:

- Choose the appropriate bushing size that matches the barrel shank diameter.
- Refer to the product specifications for available sizes: #4, 7, 8, 9, 10, 11, 5, 6, 12, and 13.

2. Installing the Bushing:

- Place the selected bushing onto the barrel.
- Ensure that the bushing is aligned properly and seated securely.

3. Clamping the Barrel:

- Insert the barrel with the bushing into the barrel vise.
- Tighten the vise according to the manufacturer's instructions, ensuring a secure fit without overtightening.

4. Using the Bushing:

- Proceed with the intended task (e.g., loosening or tightening the barrel).
- Use slow and steady movements to avoid damaging the bushing or the barrel.

5. Removing the Bushing:

- Once the task is complete, carefully loosen the vise to release the barrel.
- Remove the bushing from the barrel and inspect for any signs of damage.

Disposal Instructions

- Dispose of any damaged or worn bushings in accordance with local regulations for metal recycling.
- Ensure that all components are disposed of in an environmentally responsible manner.

Contact Information for Further Support

For any safety inquiries or further assistance related to the BARREL VISE BUSHINGS #14 M1 CARBINE ALUMINUM BARREL VISE BUSHING, please refer to the manufacturer's customer support resources.

Please keep this guide for future reference to ensure safe and effective use of the product. Thank you for your attention to safety.
