

# ACRAGLAS RELEASE AGENT - BROWNELLS ACRAGLAS NON-FLAMMABLE RELEASE AGENT, 3OZ

[Gunsmith Tools](#) > [Stock Work & Finishing](#) > [Stock Bedding Accessories](#) > [Mold Releases](#)

Our traditional Release Agent and our new, easy-to-ship, Non-Flammable Release Agent selectively lets Acraglas bond to the stock but not to the barreled action. Both products present nearly identical physical characteristics, and are applied in exactly the same manner with no noticeable difference in dry time. Both form a smooth, vinyl-like coating between the bedding compound and metal. Non-Flammable Release Agent is a non-flammable, non-hazardous formula that can be transported by air, immediately upon request, safely and legally within and outside the Continental U. S., so there's no more waiting for ground shipments to arrive when you need an Acraglas kit or extra release agent in a hurry.

## Attributes

- Name: [BROWNELLS ACRAGLAS NON-FLAMMABLE RELEASE AGENT, 3OZ](#)
- Manufacturer: [BROWNELLS](#)

# ACRAGLAS RELEASE AGENT SAFETY INSTRUCTION GUIDE

## Introduction

Thank you for choosing the ACRAGLAS RELEASE AGENT by Brownells. This guide provides essential safety instructions and usage information to ensure the safe application of the product. Please read this guide carefully before use.

## General Safety Guidelines

- Always ensure that the product is stored in a cool, dry place away from direct sunlight.
- Keep the product out of reach of children and pets.
- Use the product only for its intended purpose as described in this guide.
- In case of accidental skin or eye contact, rinse immediately with plenty of water and seek medical advice if irritation persists.
- Do not ingest the product. If swallowed, seek medical attention immediately.
- Ensure proper ventilation when using the product to avoid inhalation of fumes.
- Report any unsafe products or accidents to the appropriate authorities.

## Specific Safety Precautions for Use

- **Personal Protective Equipment (PPE):**
  - Always wear gloves and safety goggles when handling the release agent.
- **Ventilation:**
  - Use in a wellventilated area to minimize inhalation risks.
- **Flammability:**
  - Although the NonFlammable Release Agent is designed to be nonflammable, avoid exposure to open flames and high temperatures.
- **Storage:**
  - Store the product upright in its original container, tightly closed, and away from incompatible materials.

## Instructions for Installation and Usage

1. **Preparation:**
  - Ensure the surface to be treated is clean and free of dust, grease, or moisture.
  - Shake the bottle well before use to ensure even distribution of the release agent.
2. **Application:**
  - Apply a thin, even layer of the release agent to the stock surface using a clean brush or cloth.
  - Allow the release agent to dry completely before proceeding with the Acraglas application. This typically takes a few minutes, but drying time may vary based on environmental conditions.
3. **PostApplication:**
  - After the Acraglas has cured, carefully remove any excess release agent from the surface.
  - Clean tools and any spills immediately with a suitable solvent.

## Disposal Instructions

- Dispose of any unused product and empty containers in accordance with local regulations.
- Do not dispose of the product in household waste. Check with your local waste disposal authority for proper disposal methods.

## **Contact Information for Further Support**

For additional questions or concerns regarding the use of this product, please contact the manufacturer or refer to the product packaging for further guidance.

## **Conclusion**

By following these safety instructions, you can ensure a safe and effective experience with the ACRAGLAS RELEASE AGENT. Always prioritize safety and comply with the guidelines provided in this manual. Thank you for your attention and safe usage!
