Extend Oxynate No. 7 Solution Life Cleans Out Crud; You Get More Bluing Per Bath

Modern hot bluing solutions (such as Oxynate No. 7) are often replaced before their chemical activity is depleted because of accumulated crud in the tank. This crud includes depleted chemicals which are staying suspended in the bath, airborne dirt particles and the residue from inadequate cleaning/rinsing. Industry uses expensive and complicated filters to remove this crud. To use our Bluing Solution Cleaner, first add it to the cold bath, stir well as the bath heats, and then skim the bluing bath thoroughly when operating temperature is reached. Your bath will be returned to a clean, trouble-free operation. Plus, the cleaner stays in solution instead of being "used up", so the crud keeps right on coming to the top for easy skim-off. Keeps the bath clean and bluing, and greatly extends solution life& paying for itself many times over.

Bluing Solution Cleaner Safety Instructions

Introduction

Thank you for choosing the Bluing Solution Cleaner. This product is designed to help maintain the cleanliness and effectiveness of your hot bluing baths. To ensure safe and effective use, please read and follow these safety instructions carefully.

General Safety Guidelines

- Always use the product in a wellventilated area to avoid inhalation of fumes.
- Keep the product out of reach of children and pets.
- Store the product in a cool, dry place, away from direct sunlight and heat sources.
- Do not mix this product with other chemicals unless specified in the instructions.
- In case of accidental contact with skin or eyes, rinse immediately with plenty of water and seek medical advice if irritation persists.
- Dispose of any unused product or waste materials in accordance with local regulations.

Specific Safety Precautions for Use

- Wear appropriate personal protective equipment (PPE) such as gloves and safety goggles when handling the cleaner.
- Avoid ingestion. Do not eat, drink, or smoke while using the product.
- Ensure that the area is free from open flames or sparks, as the product may be flammable.
- Do not use on surfaces that are not compatible with chemical cleaners; check compatibility before application.
- Follow all manufacturer instructions regarding dilution and application to prevent damage to surfaces or equipment.

Instructions for Installation and Usage

1. Preparation:

- Ensure that the bluing bath is cold before adding the Bluing Solution Cleaner.
- Gather all necessary equipment, including a stirring tool and skimming tool.

2. Application:

- Add the recommended amount of Bluing Solution Cleaner to the cold bluing bath.
- Stir the solution thoroughly as the bath heats up to ensure proper mixing.
- Once the operating temperature is reached, skim the surface of the bluing bath to remove accumulated crud.

3. Maintenance:

- Regularly check the cleanliness of the bluing bath and repeat the cleaning process as necessary.
- Monitor the performance of the cleaner to ensure it is effectively maintaining the bath.

Disposal Instructions

- Dispose of any unused Bluing Solution Cleaner in accordance with local hazardous waste regulations.
- Do not pour the product down the drain unless specifically instructed to do so.
- Consult local waste disposal guidelines for proper disposal methods.

Contact Information for Further Support

For any questions or concerns regarding the use of Bluing Solution Cleaner, please refer to the manufacturer's contact information provided on the product packaging.

By following these safety instructions, you can ensure a safe and effective experience with the Bluing Solution Cleaner. Thank you for your attention to safety, and enjoy using your product!
