

BLACK IRON SCREEN WIRE - BROWNELLS SCREEN WIRE, STAINLESS STEEL

[Gunsmith Tools](#) > [Metal Prep & Coloring](#) > [Metal Bluing](#) > [Bluing Tank Baskets](#)

Ideal For Small Parts Baskets-Won't Injure Bath

Line our Bluing Parts Basket with this black iron screen wire, to make a well supported, small parts basket with enough room to hold many, many small parts and not lose them into the bath. Easily cut with snips and folded to shape. The mesh is large enough to let the bluing solution circulate, yet small enough to keep pins and screws from falling through. Pure, uncoated wire, won't contaminate your bath.

Safety Instruction Guide for BLACK IRON SCREEN WIRE

Introduction

Thank you for choosing the BLACK IRON SCREEN WIRE by Brownells. This product is designed to help you create a secure and functional parts basket for use in bluing applications. Please read this safety instruction guide carefully to ensure safe and effective use of the product.

General Safety Guidelines

- Always handle the screen wire with care to avoid injury from sharp edges.
- Ensure that the workspace is clean and free from any hazards that could cause accidents.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly inspect the screen wire for signs of wear or damage before each use.
- Follow all local regulations regarding the disposal of metal products.

Specific Safety Precautions for Use

- When cutting the screen wire, use appropriate snips and wear safety gloves to protect your hands.
- Avoid placing the wire in areas where it can come into contact with moisture or corrosive substances unless it is intended for such use.
- Do not exceed the recommended load capacity of the parts basket to prevent deformation or breakage.
- Ensure that the bluing solution used is compatible with stainless steel and black iron materials to avoid chemical reactions.

Instructions for Installation and Usage

1. Preparation

- Choose a clean, dry workspace.
- Gather all necessary tools, including snips and safety gloves.

2. Cutting the Wire

- Measure the required length of black iron screen wire.
- Use snips to cut the wire to the desired size, ensuring that the edges are smooth.

3. Shaping the Basket

- Fold the cut wire to create a basket shape that will securely hold small parts.
- Ensure that the mesh is tightly shaped to prevent small items from falling through.

4. Loading the Basket

- Place small parts into the basket, ensuring they are well distributed for even exposure to the bluing solution.
- Avoid overloading the basket to maintain structural integrity.

5. Using the Basket in the Bluing Tank

- Carefully lower the basket into the bluing tank, ensuring that it is stable and secure.
- Monitor the parts during the bluing process to ensure they are not lost or damaged.

6. PostUse Care

- After use, carefully remove the basket from the tank.
- Rinse the basket with clean water to remove any residual bluing solution.
- Allow the basket to dry completely before storage.

Disposal Instructions

- Dispose of any damaged or wornout screen wire in accordance with local recycling regulations.
- Do not dispose of in regular household waste if local regulations require metal products to be recycled separately.

Contact Information for Further Support

For any questions or concerns regarding the BLACK IRON SCREEN WIRE, please refer to the manufacturer's contact information provided with your product packaging. Additionally, you can check for safety updates and recall information on the EU Safety Gate platform.

Thank you for your attention to these safety instructions. Your safety and satisfaction are our top priorities.
