

SILICON CARBIDE ABRASIVE COMPOUND #240 GRIT

[Gunsmith Tools & Supplies](#) > [Metal Prep & Coloring](#) > [Abrasives](#) > [Lapping Compounds](#)

Sharp-Edged Silicon Carbide Self-Lubricating Petroleum Base

The very best abrasive compound for "hard fitting" two pieces of steel. Stands up to continued fitting even on hardened and heat-treated steel. Silicon carbide grit combined with a thick, long lasting lubricant breaks down into smaller and smaller sharp-edged particles to keep cutting longer than aluminum oxide compounds. For use on steel only. Remove with solvent.

Attributes

- Name: [SILICON CARBIDE ABRASIVE COMPOUND #240 GRIT](#)
- Manufacturer: [BROWNELLS](#)

Safety Instruction Guide for Silicon Carbide Abrasive Compound #240 Grit

Introduction

Thank you for choosing the Silicon Carbide Abrasive Compound #240 Grit. This product is designed for "hard fitting" two pieces of steel and is suitable for use on hardened and heat-treated steel. To ensure safe and effective use of this abrasive compound, please read and follow the safety instructions outlined in this guide.

General Safety Guidelines

- Always handle the abrasive compound with care.
- Ensure proper ventilation when using the product to avoid inhalation of dust.
- Keep the product out of reach of children and pets.
- Wear appropriate personal protective equipment (PPE), including safety goggles and gloves.
- Be aware of potential hazards associated with the product and take necessary precautions.
- Regularly check for any updates or recalls related to the product on the EU Safety Gate platform.

Specific Safety Precautions for Use

- Avoid contact with skin. If contact occurs, wash the affected area with soap and water.
- Do not ingest the product. If ingested, seek medical attention immediately.
- Use only in well-ventilated areas to minimize inhalation risks.
- Do not use on materials other than steel, as this may lead to ineffective results or hazards.
- Store the product in a cool, dry place away from direct sunlight and heat sources.
- Dispose of any unused product or waste material according to local regulations.

Instructions for Installation and Usage

1. Preparation:

- Ensure the work area is clean and free from any obstructions.
- Gather all necessary tools and protective equipment before starting.

2. Application:

- Apply a small amount of the Silicon Carbide Abrasive Compound to the surfaces that need fitting.
- Use appropriate tools to work the compound into the surfaces, ensuring even distribution.

3. Fitting Process:

- Carefully fit the two pieces of steel together, applying consistent pressure.
- Periodically check the fitting progress and reapply the compound as needed.

4. Cleanup:

- After use, remove any excess compound with a suitable solvent.
- Clean tools and work surfaces to prevent contamination.

Disposal Instructions

- Dispose of any unused abrasive compound and waste material in accordance with local regulations.
- Do not pour down drains or dispose of in regular household waste.

- Check with local authorities for specific disposal guidelines related to hazardous materials.

Contact Information for Further Support

For any questions or concerns regarding the Silicon Carbide Abrasive Compound #240 Grit, please consult the product packaging or your retailer for further assistance.

Thank you for following these safety instructions. Your safety is our priority.
