

# J-B® NON-EMBEDDING BORE CLEANING COMPOUND - BROWNEllS J-B BORE CLEANING COMPOUND 1/4OZ

[Gun Cleaning & Chemicals](#) > [Solvents & Degreasers](#) > [Bore Cleaning Paste](#)

**Cuts Through Toughest Bullet Jacket & Powder Fouling - Can't-Run Paste Formulation - Cushioned Abrasive Action Leaves Bores Sparkling - Won't "Eat" Stock Finishes**

The original, time-proven formula developed by Jim Brobst and produced under exclusive license. J-B has been getting burned-on, caked-in powder residue and copper jacket fouling out of gun barrels since the 1960's, and hasn't damaged an inch of rifling yet. Today, J-B once again proves itself a champion by the way it easily cleans the dirtiest, moly-fouled barrels. A unique combination of ingredients and a one-of-kind, multi-step mixing process give J-B its special characteristics. They work together to cushion the abrasive action; the soft paste liquifies as you use it, then wipes out of the bore easily. The non-embedding feature means there's no abrasive residue left behind which might keep "cutting" after you've finished cleaning. J-B has been a favorite on gunsmiths' benches for years, as a "magic" cure for customer guns that "...just won't shoot anymore". These pros know that a good scrubbing with J-B often restores accuracy. Match and varmint shooters put a lot of rounds down range, many of those using moly coated bullets. The large amounts of copper fouling and the burned-in moly can create a cleaning nightmare; J-B makes short work of it. Use J-B with the Lewis Lead Remover to get the last speck of leading out of pistol bores. Shotguns combine lead, powder and plastic fouling to really throw patterns off; J-B cleans it all out quickly and easily. Here's what a couple of the most respected names in the shooting industry have said about J-B. Jim Carmichel, gun writer and dedicated shooter, "I have used J-B for years and routinely use it even on my very finest benchrest rifles. When no other bore cleaner will get the job done, J-B will." The late Warren Page, a benchrest shooting legend, wrote the praises of J-B when it was first introduced to the shooting public. He said, " J-B is an ultra mild, abrasive oil paste, finer than jewelers' rouge, which we in the rifle accuracy shenanigan, a few years ago, found was the answer to problems of metal fouling and serious powder fouling that solvents either won't touch, or will cut only by much labor." And, "... it was quickly discovered that such an extremely fine abrasive, used with discretion, would take out caked powder residue and mild metal streaking without ruining the bore."

# JB® NonEmbedding Bore Cleaning Compound Safety Instruction Guide

## Introduction

Welcome to the safety instruction guide for JB® NonEmbedding Bore Cleaning Compound. This guide provides essential information to ensure the safe and effective use of this product. Please read this guide carefully and follow the instructions to avoid any potential hazards.

## General Safety Guidelines

- Always store the product in a cool, dry place, away from direct sunlight and heat sources.
- Keep out of reach of children and pets to prevent accidental ingestion or misuse.
- Use the product only for its intended purpose as described in this guide.
- Avoid contact with eyes and skin. If contact occurs, rinse thoroughly with water.
- Do not ingest. If swallowed, seek medical attention immediately.
- Ensure adequate ventilation when using the product to minimize inhalation of fumes.
- Dispose of any unused product or waste in accordance with local regulations.

## Specific Safety Precautions for Use

- Wear protective gloves and safety goggles when handling the compound to prevent skin and eye irritation.
- Do not mix with other cleaning agents or chemicals, as this may cause harmful reactions.
- Use in a wellventilated area to avoid inhaling vapors.
- Avoid prolonged exposure to the product. If you experience any adverse reactions, discontinue use and seek medical advice.
- Keep the container tightly closed when not in use to prevent spillage and contamination.

## Instructions for Installation and Usage

### 1. Preparation

- Ensure the firearm is unloaded and in a safe condition before cleaning.
- Gather all necessary materials, including cleaning patches, a cleaning rod, and protective gear.

### 2. Application

- Apply a small amount of JB Bore Cleaning Compound to a cleaning patch or directly onto the bore.
- Insert the cleaning rod with the patch into the bore and move it back and forth to distribute the compound evenly.

### 3. Cleaning Process

- Allow the compound to sit for a few minutes to penetrate fouling and residue.
- Use a clean patch to wipe out the bore, removing the compound along with fouling.
- Repeat the process as necessary until the bore is clean.

### 4. PostCleaning

- After cleaning, ensure the bore is thoroughly dry.
- Apply a light coat of oil to protect the bore from corrosion.

## **Disposal Instructions**

- Dispose of any unused product and cleaning materials in accordance with local hazardous waste disposal regulations.
- Do not dispose of the product in household waste or down the drain.

## **Contact Information for Further Support**

For any safety inquiries or concerns regarding the use of this product, please refer to the manufacturer's website or customer service for assistance.

Thank you for choosing JB® NonEmbedding Bore Cleaning Compound. Your safety is our priority.
