

# SURGICAL TUBING - BROWNELLS SURGICAL TUBING, TYPE A, 12 FT

[Gunsmith Tools](#) > [Stock Work & Finishing](#) > [Stock Bedding Accessories](#) > [Surgical Tubings](#)

## Constant Pressure To Hold Where You Want It- How You Want It

The stretchiest, pullingest, self-tightening clamp you can buy& Pure Gum Surgical Latex Tubing! Wrapped around a split gun stock, it will draw the glue line so thin it looks like part of the grain, with no "clamp marks" in the wood and no slipping or pulling-off of the joint. For holding all irregular surfaces it is unsurpassed - gluing, forming, jiggling, aligning - use the Pulling Power of surgical tubing. (It also makes excellent slingshot rubbers.)Use no knots. Tuck over one end and wrap over it, as shown, when pulling the tube around the part being held. Make the final tuck as shown. A small wedge or wood dowel simplifies making this final tuck. Guaranteed to hold! Choate's Rifle Shop, Palmdale, CA., reports, "I have been using my piece of tubing for 8 years and repaired stocks split end-to-end using ACRAGLAS®. It will stick to ACRAGLAS®, but pulls right off with no damage to the tubing. Use it for forend tips, grip caps, cracked and split stocks & " Stocked in 2 weights. Type A is for light, multiple wrap jobs. Type B is for long pull or where greater tension is desired.

# Safety Instruction Guide for Brownells Type A Surgical Tubing

## Introduction

Thank you for choosing Brownells Type A Surgical Tubing. This guide provides essential safety instructions to ensure the safe and effective use of this product. Please read this manual carefully before use to understand the potential hazards and how to avoid them.

## General Safety Guidelines

- Ensure the product is used only for its intended purpose as described in this guide.
- Always inspect the tubing for any signs of damage or wear before each use.
- Keep the product out of reach of children and vulnerable individuals.
- Do not use the tubing for any applications that exceed its specified limits.
- In case of any accidents or unsafe conditions, report them to the relevant authorities.

## Specific Safety Precautions for Use

- Avoid exposure to extreme heat or flames, which may damage the tubing.
- Do not stretch the tubing beyond its recommended limits to prevent snapping.
- When handling the tubing, be cautious of sharp edges or tools that may cause injury.
- Ensure that the tubing is securely fastened and will not slip or come loose during use.
- If using for gluing or forming, ensure adequate ventilation to avoid inhalation of fumes.

## Instructions for Installation and Usage

### 1. Preparation:

- Gather all necessary tools and materials before starting.
- Ensure the work area is clean and free from hazards.

### 2. Using the Tubing:

- Tuck one end of the tubing over the item being held.
- Wrap the tubing around the item, ensuring it is tight and secure.
- Make a final tuck as shown in the product instructions.
- A small wedge or wood dowel can help simplify this final tuck.

### 3. Application:

- Use the tubing for gluing, forming, jigging, and aligning irregular surfaces.
- For best results, apply the tubing evenly and avoid overlaps that may create weak points.

### 4. PostUse:

- Carefully remove the tubing from the item after the adhesive has set.
- Inspect the tubing for any damage and store it properly for future use.

## Disposal Instructions

- Dispose of any damaged or unusable tubing in accordance with local regulations.
- Do not dispose of the tubing in a manner that could harm the environment or wildlife.

## **Contact Information for Further Support**

For any inquiries regarding safety or product usage, please refer to the relevant contact points provided by your local retailer or manufacturer.

By following these guidelines, you can ensure a safe and effective experience with Brownells Type A Surgical Tubing. Thank you for your attention to safety!
