

NICKEL-PLATED REM 700 TRIGGERGUARD SCREWS - BROWNEllS LONG TRIGGERGUARD ALLEN SCREWS FOR REMINGTON 700 BDL, NICKEL

[Rifle Parts](#) > [Triggers Parts](#) > [Trigger Guard Parts](#) > [Trigger Guard Screws](#)

Don't Get Caught Short When Bedding Rifle Actions In Aftermarket Stocks

Nickel plated screws blend visually with Remington 700 stainless steel actions. Approximately .250" longer than the factory screws for greater flexibility when bedding in synthetic or wood stocks with thick, cross-sectional depth. Allen head sockets allow repeatable torque settings on match or target rifles.

NICKELPLATED REM 700 TRIGGERGUARD SCREWS SAFETY INSTRUCTION GUIDE

Introduction

Thank you for choosing the NickelPlated Rem 700 Triggerguard Screws from Brownells. This guide provides essential safety instructions and guidelines to ensure the safe use, installation, and disposal of the product in compliance with the EU General Product Safety Regulation (GPSR). Please read this guide carefully before using the screws.

General Safety Guidelines

- Ensure that the screws are used only for their intended purpose with Remington 700 BDL long triggerguards.
- Always inspect the screws for any signs of damage or wear before installation.
- Keep screws out of reach of children and vulnerable individuals to prevent accidental injury.
- Report any unsafe conditions or accidents to the appropriate authorities.
- Regularly check for recall updates on the EU's Safety Gate platform to stay informed about product safety.

Specific Safety Precautions for Use

- Use appropriate tools (such as an Allen wrench) to ensure proper installation and avoid stripping the screw heads.
- Do not exceed the recommended torque settings when tightening screws to prevent damage to the firearm or screws.
- Avoid using the screws in environments where they may be exposed to extreme temperatures or corrosive substances.
- If you notice any unusual sounds or movements while using the firearm, stop use immediately and inspect the screws and triggerguard.

Instructions for Installation and Usage

1. Preparation:

- Gather all necessary tools, including an Allen wrench suitable for the screw heads.
- Ensure the firearm is unloaded and in a safe condition before beginning installation.

2. Installation Steps:

- Remove the existing screws from the triggerguard using the appropriate tool.
- Inspect the triggerguard and surrounding area for any debris or damage.
- Select the correct screw length for your application:
 - 1/4x28, 2.270" long
 - 1/4x28, 1.740" long
 - 836x2.250" long
- Insert the screws into their respective holes in the triggerguard.
- Using the Allen wrench, tighten each screw gradually. Follow these guidelines:
 - Tighten screws in a crisscross pattern to ensure even pressure.
 - Do not overtighten; follow the recommended torque settings for your firearm.

3. PostInstallation Check:

- Once all screws are installed, check for tightness using the Allen wrench.
- Ensure that the triggerguard is securely attached and does not move.

Disposal Instructions

- Dispose of any damaged or unused screws in accordance with local regulations.
- Do not dispose of screws in regular household waste; consider recycling if applicable.
- Ensure that screws are kept out of reach of children during disposal.

Contact Information for Further Support

For any questions or concerns regarding the NickelPlated Rem 700 Triggerguard Screws, please refer to the product documentation or contact the retailer from whom you purchased the product. Always ensure you have the latest safety information and support available.

Thank you for your attention to these safety instructions. Enjoy the reliable performance of your NickelPlated Rem 700 Triggerguard Screws.
