Don't Get Caught Short When Bedding Rifle Actions In After-Market Stocks

Precision-turned, heat-treated screws provide extra reach when bedding Remington rifle actions in synthetic or wooden stocks with thicker, cross-sectional depth. Approximately .250" longer than the factory screws for greater flexibility in bedding depth. Action screw kits are available with the standard slotted head to match the factory screws or with Allen head sockets that allow repeatable torque settings on match or target rifles.

LONG TRIGGERGUARD SCREWS BROWNELLS

REMINGTON 7 Safety Instruction Guide

Introduction

Thank you for purchasing the LONG TRIGGERGUARD SCREWS by BROWNELLS for the Remington 7. This guide provides essential safety information and instructions to ensure the safe and effective use of this product. Please read this manual carefully before installation and usage.

General Safety Guidelines

- Always ensure that the firearm is unloaded before attempting any installation or adjustment.
- Keep the screws and any small parts out of reach of children to prevent accidental ingestion or injury.
- Inspect the screws for any signs of damage or defects before use. Do not use damaged screws.
- Follow all manufacturer guidelines and recommendations for your specific firearm model.
- Use proper tools and techniques during installation to avoid personal injury or damage to the firearm.

Specific Safety Precautions for Use

- Use only the specified screws for your Remington 7 model to ensure proper fit and function.
- Avoid overtightening screws, as this may lead to damage to the firearm or the screws themselves.
- Ensure that the screws are securely fastened but not excessively tightened. Refer to torque specifications if available.
- If you are unsure about the installation process, consult a qualified gunsmith for assistance.
- Always wear appropriate safety gear, such as safety glasses, when working with firearms.

Instructions for Installation and Usage

1. Preparation

- Ensure the firearm is completely unloaded and in a safe working area.
- Gather all necessary tools, including a screwdriver or Allen wrench suitable for the screws.

2. Installation Steps

- Remove the existing trigger guard screws from the Remington 7 using the appropriate tool.
- Align the LONG TRIGGERGUARD SCREWS with the trigger guard holes.
- Insert the screws into the holes, ensuring they are seated properly.
- Tighten the screws gently, alternating between screws to ensure even pressure. Do not exceed the recommended torque.

3. PostInstallation Check

- After installation, check that the trigger guard is secure and does not move.
- Test the firearm's function to ensure everything operates correctly.

Disposal Instructions

- Dispose of any unused or damaged screws in accordance with local regulations.
- Do not throw screws in regular household waste. Check for local recycling or hazardous waste disposal options.

Contact Information for Further Support
