The Ed Brown Machined Wide Thumb Safety provides a large pad for quick actuation of the safety. This version is fully machined from stock for unbeatable quality and no chance of warping or porosity. The most ergonomic and attractive thumb safety on the market! Widest design 1/4" levers for "high thumb" shooting style. This allows the shooter to rest the thumb on top of the safety as Jeff Cooper and others recommend. Shaped for shooting comfort, the lever is angled slightly to keep the thumb from contacting the slide and has a double angle to fit the thumb perfectly. May be custom trimmed to any slimmer proportions with no loss of style or function. Designed for all 1911 type frames and made from high quality steel. Available in blued or stainless steel. Requires minor gunsmith fitting for safe operation and includes complete instructions.
