A More Comfortable Grip for Your Favorite Glock

Hate that little cutout in the front of your Gen 5 Glock grip? Pierce Grips has a way to solve that problem and improve your gun grip with the company's Enhanced Baseplate designed for The G17, G19 and G34 Gen 5 models from Glock. Each Enhanced Baseplate are simple, swap-in replacements for the OEM factory baseplates on the Glock G19 magazine. Once fitted to a factory magazine body, the floor plate fills that semi-circular cutout in the front area of the grip, offering a more-comfortable hold on the gun. The Pierce Grips Enhanced Baseplate does not change the capacity of a Glock magazine, and all other Glock factory components are still retained. The design will only work on magazines equipped with the dual notches for the ambidextrous magazine release.
