Delivers A Precise, Comfortable Trigger Pull, Plus Strength & Reliability

High-performance trigger is built for shooters who run their guns hard, yet want a precise, smooth, consistent trigger pull. Solid aluminum shoe gives a comfortable, natural finger position to help prevent uneven pressure that can compromise accuracy. Smooth, curved face with radiused edges won't abrade the finger, and a choice of shoe lengths lets you set a length of pull that concentrates the pull force on the centerline of the trigger. Shoe is permanently staked to a non-flex bow of hardened stainless steel with a mirror-polished surface that eliminates friction with the frame. Fixed, internal overtravel stop lets you set the precise amount of overtravel when you install the trigger, and won't back out over time. Simply file the tip of the stop until it allows the sear nose to clear the hammer hooks and half-cock notch.
