## Best Way To Remove Carbon Buildup From Gas Plug & Piston Bores

**M14/M1A GAS SYSTEM CLEANING DRILLS** The Sadlak Industries M14/M1A Gas System Cleaning Drills are specialized tools designed to maintain the functionality and reliability of M14 and M1A rifles. These cleaning drills are a must-have for firearm enthusiasts and professionals seeking to ensure optimal gas system performance. **Key Features:** **Precision Machined:** The drills are manufactured to exact tolerances, ensuring a perfect fit for cleaning the gas system ports and components of M14 and M1A rifles. **Durable Construction:** Made from high-quality materials, these drills are built to withstand repeated use, offering long-lasting reliability. **Efficient Cleaning:** Designed specifically for the M14 and M1A platforms, these drills remove carbon buildup and debris from gas system ports, maintaining proper operation and accuracy. **Easy to Use:** The tools are straightforward to operate, making them accessible to both professional armors and firearm enthusiasts. **Applications:** The Sadlak Industries M14/M1A Gas System Cleaning Drills are ideal for maintaining the gas system of your rifle, ensuring it operates at peak efficiency. Regular use can help prevent malfunctions caused by carbon buildup and extend the life of the firearm. **Specs:** **Bits:** Hardened Carbon Steel, **Black Oxide Coated Handles:** 6061 T6 Aluminum, **O.D. Green Gas Plug Drill:** "O" Size/ .316" (8mm) diameter. 1-5/8" (4cm) long bit. **Piston Drill:** #15: .180" (4.6mm) diameter, 2" (5.1cm) long bit. "P" size: .323 (8.2mm) diameter, 1-5/8" long bit. **Customer Feedback:** Customers appreciate the precision and reliability of these cleaning drills, noting their effectiveness in maintaining gas system performance. Many users highlight the high-quality construction and ease of use, which make these tools an essential addition to any M14 or M1A maintenance kit. **Summary:** The Sadlak Industries M14/M1A Gas System Cleaning Drills are an indispensable tool for maintaining the reliability and accuracy of M14 and M1A rifles. With their precision machining and durable construction, they provide an efficient solution for cleaning gas system components, ensuring your firearm performs at its best. Whether you're a professional or an enthusiast, these cleaning drills are a valuable addition to your gunsmithing toolkit.

## Attributes

- Name: [SADLAK INDUSTRIES GAS PLUG O DRILL SET .316 DIA. FOR SPRINGFIELD M14/M1A](#)
- Manufacturer: [SADLAK INDUSTRIES](#)
- Product no.: 100005518
- Mfr. No.: 140201
- Colour: O.D. Green
- Diameter (in): .316
- Model: M14,M1A
- Weapon type: Springfield
- Delivery weight: 0.045kg
- Shipping height: 25mm
- Shipping width: 79mm
- Shipping length: 173mm

# Safety Instruction Guide for M14/M1A Gas System Cleaning Drills

## Introduction

Thank you for choosing the Sadlak Industries M14/M1A Gas System Cleaning Drills. These specialized tools are designed to maintain the functionality and reliability of M14 and M1A rifles. This guide provides important safety instructions to ensure the safe use and handling of these products in compliance with the EU General Product Safety Regulation (GPSR).

## General Safety Guidelines

- Ensure that all safety precautions are followed when using the cleaning drills.
- Always handle tools with care to prevent injury.
- Keep the cleaning drills out of reach of children and vulnerable individuals.
- Regularly inspect the tools for any signs of wear or damage before use.
- Use the tools only for their intended purpose as described in this manual.
- Report any unsafe product concerns or accidents to the appropriate authorities.

## Specific Safety Precautions for Use

- Always wear appropriate personal protective equipment (PPE), such as safety glasses and gloves, when using the cleaning drills.
- Ensure that the firearm is unloaded and the chamber is clear before using the cleaning drills.
- Do not use the cleaning drills on firearms that are not compatible with M14 or M1A systems.
- Avoid applying excessive force when using the drills to prevent damage to the gas system components.
- Store the cleaning drills in a safe and dry location when not in use to prevent accidents.

## Instructions for Installation and Usage

### 1. Preparation:

- Ensure that the firearm is unloaded and safe to work on.
- Gather all necessary tools and materials, including the cleaning drills.

### 2. Using the Gas Plug Drill:

- Select the appropriate gas plug drill size, which is "O" Size / .316" (8mm) diameter.
- Insert the drill into the gas system port gently.
- Rotate the drill slowly to remove carbon buildup and debris.
- Withdraw the drill carefully once the cleaning is complete.

### 3. Using the Piston Drill:

- Choose the appropriate piston drill size based on the component you are cleaning.
- For #15 drill: .180" (4.6mm) diameter, 2" (5.1cm) long bit.
- For "P" size drill: .323" (8.2mm) diameter, 15/8" long bit.
- Insert the drill into the piston area and rotate gently to clean.
- Remove the drill carefully after cleaning.

### 4. PostCleaning:

- Inspect the gas system ports for any remaining debris.

- Clean the area around the gas system with a lintfree cloth.
- Store the cleaning drills in their designated case or location.

## **Disposal Instructions**

- Dispose of any worn or damaged cleaning drills in accordance with local regulations.
- Do not dispose of cleaning drills in regular household waste if they contain hazardous materials.
- Contact local waste management services for guidance on proper disposal methods.

## **Contact Information for Further Support**

For any safety inquiries or concerns regarding the use of the M14/M1A Gas System Cleaning Drills, please refer to the contact information provided with your product packaging or visit the manufacturer's website for additional support.

By following these safety instructions, you can ensure the safe and effective use of your Sadlak Industries M14/M1A Gas System Cleaning Drills. Thank you for your attention to safety and for choosing our products.
