[Handgun Parts](#) > [Trigger Group Parts](#) > [Connector Parts](#)

Redesigned connector reduces the factory trigger pull down to 3½ to 5 lbs., while it drastically shortens or completely eliminates accuracy-robbing over-travel. A debris channel lets dust, dirt, grit, and other foreign matter exit the trigger system, helping to ensure reliable function. Three models available to meet a variety of needs, including concealed carry, competition, and law enforcement use. The Rocket also features a 3½ pull, with a Trigger Control Tab that lets you completely eliminate over-travel for maximum accuracy. Some fitting required.
