

SIRT 110 PRO TRAINING PISTOL - NEXT LEVEL TRAINING SIRT TRAINING PISTOL W/ GRN SHOT LASER

[Shooting Accessories](#) > [Training & Safety Gear](#) > [Training & Simulation](#)

Gives The Most Realistic Training Experience Short Of Live Fire

"Shot Indicating Resetting Trigger" training pistol simulates the size, weight, and functional features of a Glock 17/22 pistol to provide an exceptionally realistic supplement to actual live-fire training. The dual-laser system gives the trainee detailed feedback on what the muzzle is doing when the shot breaks and after. The red trigger "take up" laser gives immediate feedback on trigger mechanics during the trigger pull, while the green shot indicating laser gives a visual track of the trainee's follow-through. Unlike using a laser insert or cartridge in an actual pistol, the SIRT's auto-resetting trigger allows for realistic multiple strings of fire without having to rack the slide. Removable magazine can be adjusted to match the weight of various ammo loads, from 10 rounds of 115 grain 9mm to 15 rounds of 180 grain .40 S&W. A switch lets you shut off the take-up indicating laser and just train with the shot-indicating laser, and a separate, internal switch, lets you reverse the red and green lasers. Purpose-built as a training device that cannot fire a live, so no FFL required.

Attributes

- Name: [NEXT LEVEL TRAINING SIRT TRAINING PISTOL W/ GRN SHOT LASER](#)
- Manufacturer: [NEXT LEVEL TRAINING](#)
- Product no.: 100009647
- Mfr. No.: SIRT 110 PRO RG

Safety Instruction Guide for SIRT 110 PRO TRAINING PISTOL

Introduction

Thank you for choosing the SIRT 110 PRO Training Pistol. This training device is designed to simulate the size, weight, and functionality of a Glock 17/22 pistol, providing a realistic training experience. It is essential to follow the safety guidelines and instructions outlined in this document to ensure safe and effective use.

General Safety Guidelines

- Always treat this training pistol as if it were a real firearm.
- Do not point the training pistol at anything you do not intend to shoot.
- Keep the training pistol pointed in a safe direction at all times.
- Ensure that the training area is clear of unauthorized personnel.
- Do not use the training pistol in any manner inconsistent with its intended purpose.
- Regularly inspect the training pistol for any signs of wear or damage before use.
- Store the training pistol in a secure location, away from children and unauthorized users.
- Always use the training pistol in a welllit area to ensure visibility of the lasers.

Specific Safety Precautions for Use

- The SIRT 110 PRO Training Pistol cannot fire live ammunition; it is a training device only.
- Do not attempt to modify or alter the training pistol in any way.
- Be aware of your surroundings and ensure that no one is in the line of fire when using the training pistol.
- Use only the specified CR123 battery for operation; do not use other battery types.
- Adjust the weight of the removable magazine according to your training needs, ensuring it is securely in place before use.
- If the training pistol malfunctions, cease use immediately and refer to the troubleshooting section of the manual.
- Do not use the training pistol if you are feeling unwell or under the influence of substances that may impair your judgment or coordination.

Instructions for Installation and Usage

1. Installation of Battery:

- Open the battery compartment located in the grip of the training pistol.
- Insert one CR123 battery, ensuring the correct polarity is observed.
- Close the battery compartment securely.

2. Adjusting the Magazine Weight:

- Remove the magazine from the training pistol.
- Add or remove weights to match your desired training load (10 rounds of 115 grain 9mm or 15 rounds of 180 grain .40 S&W).
- Ensure the magazine is fully assembled and securely reinserted into the training pistol.

3. Using the Lasers:

- Switch on the training pistol by pressing the power button.
- Use the takeup indicating laser for feedback on trigger mechanics during the trigger pull.
- To switch to the shotindicating laser, use the designated switch to turn off the takeup laser.

- Adjust the windage and elevation of the lasers as needed for accurate training.

4. Training Procedures:

- Begin training by assuming a safe shooting stance.
- Focus on trigger control and followthrough while observing the laser feedback.
- Practice multiple strings of fire without needing to rack the slide, thanks to the autoresetting trigger.

5. PostTraining Procedures:

- Turn off the training pistol after use.
- Store the training pistol and its accessories in a safe and secure location.
- Review your training session and make notes for future improvement.

Disposal Instructions

- Dispose of the training pistol and any batteries in accordance with local regulations.
- Do not dispose of the training pistol in regular household waste.
- Check with local authorities for proper disposal methods for electronic devices and batteries.

Contact Information for Further Support

For any questions or concerns regarding the SIRT 110 PRO Training Pistol, please refer to the manufacturer's website or customer service for assistance. It is essential to have an EUbased contact for safety inquiries, and you can find this information on the product packaging or documentation.

Conclusion

By following these safety instructions and guidelines, you can ensure a safe and effective training experience with the SIRT 110 PRO Training Pistol. Your safety and the safety of others is of utmost importance. Always prioritize safety in all training activities.
