### Positive, One-Handed Operation For Both Right & Left Handed Shooters

Machined aluminum charging handle drops in to standard AR-15 receivers to give positive operation for right and left handed shooters. Built with thicker dimensions than standard charging handles to withstand wear and rough use. Large diameter coiled spring pin absorbs shock and flexes so it won't fail under extreme conditions. Broad contact points make traditional and tactical weapon manipulation easy, and grooved surfaces help weapon retention and assist positive charging operation while wearing gloves. Battle Latch Charging Handle Assembly fits AR-15s and is designed for right handed shooters. Ambidextrous Battle Latch Charging Handle fits AR-15s and gives true ambidextrous function.
