

RIFLE FACTORY CRIMP DIES - LEE PRECISION 44-40 WCF FACTORY CRIMP DIE

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

Lee Factory Crimp Die crimps the bullet in place more firmly than any other tool Tests demonstrate that even bullets which have no crimp groove will shoot more accurately A firm crimp improves accuracy because pressure must build to a higher level before the bullet begins to move. This higher start pressure insures a more uniform pressure curve and less velocity variation Features a collet that squeezes the case mouth into the crimping groove for a firm hold Shellholder not included Fits all 7/8"-14 reloading presses

Attributes

- Name: [LEE PRECISION 44-40 WCF FACTORY CRIMP DIE](#)

Safety Instruction Guide for Lee Precision 4440 WCF Factory Crimp Die

Introduction

Thank you for choosing the Lee Precision 4440 WCF Factory Crimp Die. This product is designed to provide a secure crimp for your ammunition, enhancing accuracy and performance. It is essential to follow the safety guidelines and instructions outlined in this document to ensure safe and effective use.

General Safety Guidelines

- Always handle all reloading tools and components with care.
- Ensure that your workspace is clean, welllit, and free from distractions.
- Store the crimp die and other reloading components in a secure location, out of reach of children and unauthorized users.
- Use personal protective equipment (PPE), such as safety glasses and gloves, when operating reloading equipment.
- Be aware of the specific hazards associated with reloading ammunition, including the handling of gunpowder and primers.

Specific Safety Precautions for Use

- Do not exceed the recommended load specifications for your ammunition.
- Always inspect the crimp die for any signs of damage or wear before use.
- Ensure that the die is properly installed on the reloading press before operating.
- Keep hands and clothing clear of moving parts during operation.
- Avoid using the crimp die for any purpose other than its intended use.
- Do not attempt to modify or repair the crimp die yourself; consult a qualified technician if repairs are needed.

Instructions for Installation and Usage

1. Installation:

- Ensure that your reloading press is securely mounted and stable.
- Remove any existing dies from the press.
- Screw the Lee Precision 4440 WCF Factory Crimp Die into the press using the 7/8"14 thread.
- Tighten the die securely, but do not overtighten, as this may damage the threads.

2. Usage:

- Prepare your cases by cleaning and resizing them according to standard reloading practices.
- Insert the prepared case into the shell holder of the press.
- Adjust the crimp die by raising the ram to the top of its stroke, then turning the die down until it makes contact with the case mouth.
- Lower the ram and check the crimp. Adjust as necessary to achieve the desired crimp.
- Once the crimp is set, proceed with reloading your ammunition according to your specific load data.
- After completing the crimping process, always check for uniformity and consistency in the crimp across all rounds.

Disposal Instructions

- Dispose of any unused or damaged components in accordance with local regulations.
- Do not dispose of gunpowder or primers in standard trash; consult local hazardous waste disposal guidelines.
- Ensure that all packaging materials are recycled or disposed of properly.

Contact Information for Further Support

For questions or concerns regarding the use of the Lee Precision 4440 WCF Factory Crimp Die, please consult the product documentation or reach out to the manufacturer for further assistance. Ensure to have your product details ready for reference.

By following these guidelines and instructions, you can ensure a safe and effective reloading experience with your Lee Precision 4440 WCF Factory Crimp Die. Thank you for prioritizing safety in your reloading practices.
