Pistol Carbide 3 Die Sets Safety Instruction Guide

Introduction

Thank you for purchasing the Pistol Carbide 3 Die Sets by Lee Precision. This guide provides essential safety information and instructions to ensure the safe and effective use of your reloading equipment. Please read this manual carefully before using the product.

General Safety Guidelines

- Always wear safety glasses when using reloading equipment to protect your eyes from debris and accidental discharges.
- Keep the workspace clean and organized to avoid accidents and misplacements of components.
- Store all components, including dies and tools, in a secure location away from children and unauthorized users.
- Ensure that you are familiar with the operating instructions and safety guidelines before using the equipment.
- Regularly inspect your reloading equipment for wear and damage. Replace any damaged components immediately.
- Do not exceed the recommended load data provided in the instructions. Overloading can cause dangerous malfunctions.
- Always use the appropriate components and materials specified for the 45 ACP cartridge to ensure safe reloading.

Specific Safety Precautions for Use

- **Carbide Dies:** These dies do not require sizing lube, which reduces the risk of contamination and misfires. Ensure you understand the operation of carbide dies before use.
- **Bullet Seating Die:** Be cautious when adjusting the bullet seating depth. Improper seating can lead to dangerous pressure levels.
- **Powder Thru Expanding Die:** Use only the recommended powders for the 45 ACP cartridge. Follow the load data carefully.
- **Shell Holder:** Ensure that the shell holder is compatible with the 45 ACP cartridge to avoid improper seating and potential accidents.
- **Powder Dipper:** Use the powder dipper as directed to avoid overloading the cartridge. Always check the weight of the powder charge.

Instructions for Installation and Usage

1. Setup:

- Ensure that your reloading press is securely mounted on a stable surface.
- Gather all necessary tools and components, including the carbide die set, shell holder, powder dipper, and bullet seating die.

2. Installing the Dies:

- Remove the existing die from your reloading press if applicable.
- Install the Carbide Full Length Sizing Die into the press and tighten it securely.
- Next, install the Powder Thru Expanding Die and the Bullet Seating Die in the same manner.

3. Reloading Process:

- Start by resizing the brass cases using the Carbide Full Length Sizing Die.

- Use the Powder Thru Expanding Die to expand the case mouth and prepare it for bullet seating.
- Measure and dispense the appropriate amount of powder using the Powder Dipper.
- Insert the bullet into the expanded case and use the Bullet Seating Die to seat the bullet to the correct depth.

4. Final Checks:

- Inspect each completed cartridge for proper seating and powder levels before use.
- Store completed cartridges in a secure and organized manner.

Disposal Instructions

- Dispose of any unused or damaged reloading components in accordance with local regulations and guidelines.
- Do not dispose of hazardous materials in regular trash. Contact your local waste management facility for proper disposal methods.

Contact Information for Further Support

For any inquiries or concerns regarding the safety and use of your Pistol Carbide 3 Die Sets, please refer to the manufacturer's website or contact their customer support directly. Ensure you have your product details ready for efficient assistance.

This safety instruction guide is designed to help you operate your reloading equipment safely and effectively. By following these guidelines, you can enjoy a safe reloading experience. Always prioritize safety and stay informed about best practices in reloading.
