Prevents QD Sling Swivel Rotation & Sling Wrap Up

Machined from a single piece of 1018 billet steel, this limited rotation QD end plate has no parts to work loose or gaps to rust and corrode. Limited rotation permits easy, ambidextrous use without sling wrap-up. End plate's slightly thicker design provides for proper staking and added strength. The durable, black melonite finish matches the receiver and enhances resistance to rust, corrosion, and wear.
