

MAGNA-MATIC CORP. PRECISION STEEL DEAD-BLOW HAMMER - MAGNA-MATIC CORPORATION HAMMER TIP, DELRIN

[Gunsmith Tools](#) > [General Gunsmith Tools](#) > [Hammers](#)

Unlike all other hammers out there, the PSDB is all-steel precision CNC machined hammer. No cheap wood handles or over-molded screws for tips. This is a serious hammer for serious gunsmithing - hitting pins, punches, whatever. The PSDB can have 3 different hammer tip materials "on-board" - one can be screwed into each side of the hammer head, and the third screws into the bottom of the handle. So no matter what type of pin, or against what finish you might have to hit you can pick a hard or soft non-marring hammer tip for the job. The tips are held tight with large o-rings, so they'll never back-off and come loose. The PSDB is a whole new type of dead-blow hammer, with the PSDB Hammer from Magna-Matic Defense your not just pounding sand. Our dead-blow design incorporates a solid steel slug (rather than sand in most dead-blow hammers), this provides you with a kinetic transfer of energy that multiplies your hitting force. If you have a job where light gentle tapping is required, you can remove the steel slug, and store it in the handle of the PSDB. We have put tremendous thought into the design of this hammer, from the various curves in the handle allowing for numerous choked up hand positions for lighter tapping, or a full handle grip for maximum force. The end of our handle isn't just a clever storage area for the steel slug when not in use, since we have the third hammer tip on the end of the handle, you can produce very light gentle tapping force with the end of the handle. PSDB Hammer Includes: Hammer body/handle One brass tip One hardened steel tip One delrin (plastic) tip One steel dead-blow slug. Features All steel construction Precision CNC machined Made in the USA Interchangeable tips Steel dead-blow slug Clear zinc plated for severe corrosion resistance

Attributes

- Name: [MAGNA-MATIC CORPORATION HAMMER TIP, DELRIN](#)
- Manufacturer: [MAGNA-MATIC CORPORATION](#)
- Product no.: 100015190
- Mfr. No.: PSDB1-05
- Style: Delrin
- Delivery weight: 0.014kg
- Shipping height: 25mm
- Shipping width: 51mm
- Shipping length: 89mm
- UPC: 811275020095

MAGNAMATIC CORP. PRECISION STEEL DEADBLOW HAMMER SAFETY INSTRUCTION GUIDE

Introduction

Thank you for choosing the MAGNAMATIC CORP. Precision Steel DeadBlow Hammer (PSDB). This guide provides essential safety instructions to ensure a safe and effective use of this tool. Please read this guide carefully before using the hammer to understand its features, potential hazards, and how to use it safely.

General Safety Guidelines

To ensure your safety while using the PSDB Hammer, please adhere to the following guidelines:

- Always inspect the hammer before use for any signs of wear or damage.
- Use the hammer only for its intended purpose—gunsmithing tasks such as hitting pins and punches.
- Keep the hammer out of reach of children and unauthorized users.
- Wear appropriate personal protective equipment (PPE), including safety glasses and gloves.
- Ensure that the work area is clean and free of obstacles to prevent accidents.
- Do not use the hammer if you are under the influence of drugs or alcohol.
- Always secure the workpiece before striking to avoid movement during use.
- Be cautious of your surroundings and ensure no one is in the line of the hammer's swing.

Specific Safety Precautions for Use

To maximize safety while using the PSDB Hammer, follow these specific precautions:

- **Hammer Tip Selection:** Choose the appropriate hammer tip material based on the task:
 - Use the brass tip for softer materials to avoid damage.
 - Use the hardened steel tip for heavyduty applications.
 - Use the Delrin (plastic) tip for delicate tasks to prevent marring.
- **Tip Installation:** Ensure that the hammer tips are securely fastened using the large orings before use.
- **DeadBlow Functionality:** Understand that the hammer's design includes a solid steel slug for energy transfer. Avoid using it for tasks requiring light tapping without removing the slug.
- **Storage:** When not in use, store the hammer in a dry place and ensure the steel slug is stored in the handle.

Instructions for Installation and Usage

To ensure proper installation and usage of the PSDB Hammer, please follow these steps:

1. Selecting and Installing Hammer Tips:

- Choose a hammer tip based on the task at hand.
- Unscrew the existing tip if necessary and replace it with the selected tip.
- Make sure the tips are tightly secured to prevent them from loosening during use.

2. Using the Hammer:

- Hold the hammer firmly by the handle.
- Position the hammer head against the workpiece.
- Swing the hammer with controlled force, ensuring the motion is steady and deliberate.

- If light tapping is required, remove the steel slug from the hammer head and use the end of the handle for gentle taps.

3. PostUse Care:

- Clean the hammer after use to remove any debris or residues.
- Store the hammer in its designated area, ensuring it is safe from damage.

Disposal Instructions

When it comes time to dispose of the PSDB Hammer, please consider the following:

- If the hammer is damaged beyond repair, dispose of it in accordance with local regulations for metal and plastic waste.
- Avoid discarding it in regular household waste to minimize environmental impact.
- If unsure, contact local waste management authorities for guidance on proper disposal methods.

Contact Information for Further Support

For questions or concerns regarding the MAGNAMATIC CORP. Precision Steel DeadBlow Hammer, please refer to the contact details provided on the product packaging or visit the manufacturer's website for assistance.

Thank you for prioritizing safety while using the MAGNAMATIC CORP. Precision Steel DeadBlow Hammer. By following these guidelines, you will ensure a safer and more effective work experience.
