The Kinect™ by KDG for MLOK™ is a revolutionary QD mounting system that will change the way we attach accessories to our modular weapons platforms. Much like the Sidelok™ for Picatinny attachment, Kinect™ insures proper and easy installation, eliminating common variables that would cause issues.(ie: over tightening) Although revolutionary, Kinect™ is quite simple in its operation. There are two spring-loaded wedges in the base of the Kinect™ mounting point. When you press the accessory or rail section down in the MLOK™ slot, two tiny deployment triggers get pressed against the rail firing the wedges into place. There is nothing more frustrating than fiddling with an allen wrench (if you can find it) to get your accessories on or off your weapon with traditional modular rail sections. This changes the whole dynamic of the MLOK™ system and really makes every accessory truly removable with the ability to mount it in a second when needed.

Instructions for Installation and Usage

1. Preparation:

- Ensure all components are clean and free from debris.
- Gather necessary tools, including an allen wrench (if needed).

2. Installation:

- Locate the MLOK slot on your weapon.
- Align the Kinect™ mounting point with the MLOK slot.
- Press the accessory or rail section down into the slot firmly.
- Ensure that the deployment triggers are pressed against the rail, allowing the springloaded wedges to lock into place.
- Check that the accessory is securely attached before use.

3. Usage:

- Always verify that the accessory is properly mounted before using your weapon.
- If you need to remove the accessory, press the deployment triggers and lift the accessory out of the MLOK slot.

- Store the accessory in a safe place when not in use.

Disposal Instructions

- **Environmental Considerations:** Dispose of the product responsibly and in accordance with local regulations.
- **Recycling:** If applicable, recycle aluminum components to minimize environmental impact.
