## Makes Base Plate Removal as Fast & Easy as Using a Bottle Opener!

With the Magclaw Base Plate Removal Tool you can easily remove the floorplate from Glock® factory magazines. The Magclaw makes the process way easier than using the factory armorer's "tool," which is really just a pin punch. Turn the mag upside down and use the Magclaw just like a bottle opener to pop off the base plate quickly and easily - without risk of damaging it, or your fingers. Works on ANY Glock magazine, including G42 / G43 mags. Not for use with extended base pads or other floorplates that deviate from Glock factory configuration. Tough, reinforced black polymer construction - will not mar base plate or mag body. The Magclaw Base Plate Removal Tool falls into the category of elegantly simple products that make a tiresome chore so much easier, you can only wonder why it took so long for somebody to invent it!
