The LRI Action Wrench for Ruger® RPR / AR-15 is designed to aid you in fast, reliable, safe removal/installation of an AR-pattern rifle's barrel nut. This wrench will eliminate the headaches of sheared-off pins, damaged barrel nuts, failed wrenches, and blood loss from the operator (namely, YOU). The LRI Action Wrench for Ruger® RPR / AR-15 provides secure, non-slip 360-degree contact with the barrel nut - no way this wrench will slip off! A pinch bolt gently cinches the LRI Action Wrench to the barrel nut, eliminating offset loads that lead to slippage and damage to the barrel or its finish. Fits standard AR-15 barrel nut, DPMS LR-308 & Ruger Precision Rifle® 1/2" drive socket for use with standard torque wrench & breaker bar. Also works with a 5/8" six-sided drive. Smooth tool contours reduce wear and tear to gun parts & your hands. Tough, corrosion-resistant Parkerized finish. The LRI Action Wrench for Ruger® RPR / AR-15 is machined from billet steel - NOT A CASTING, so no risk of a hidden flaw or void in the metal leading to wrench breakage. This is one beast of a barrel nut wrench! Brownells Gun Tech™ Tip: The LRI Action Wrench requires a little math to use. Torque wrenches are calibrated to the centerline of the square drive. The LRI tool is offset, so its torque values have to be recalculated to ensure the desired amount is actually applied to the fastener. There are a number of Internet tools to help you do this, including this one: <http://www.cncexpo.com/TorqueAdapter.aspx>

Introduction

Thank you for choosing the RUGER PRECISION RIFLE ACTION WRENCH. This tool is designed to facilitate the safe and efficient removal and installation of barrel nuts on ARpattern rifles. To ensure your safety and the proper functioning of the tool, please read this safety instruction guide carefully.

General Safety Guidelines

- Always use the wrench in accordance with the manufacturer's instructions.
- Ensure that the work area is clean and free of obstructions before starting.
- Wear appropriate personal protective equipment (PPE) such as safety glasses and gloves.
- Keep the wrench out of reach of children and unauthorized users.
- Regularly inspect the wrench for any signs of wear or damage before use.
- Do not use the wrench for any purpose other than its intended use.
- If you experience any discomfort or pain while using the wrench, stop immediately and seek assistance.

Specific Safety Precautions for Use

- Ensure that the barrel nut is properly aligned before applying torque.
- Use a torque wrench that is calibrated and suitable for the specific application.
- Be cautious of sharp edges and points on the wrench.
- Avoid using excessive force when tightening or loosening the barrel nut to prevent damage.
- Use the wrench in a welllit area to improve visibility and accuracy.
- If the wrench slips during use, stop and reassess the situation to prevent injury.

Instructions for Installation and Usage

1. Preparation

- Gather all necessary tools, including the LRI Action Wrench, torque wrench, and any other required tools.
- Ensure the firearm is unloaded and secured in a stable position.

2. Using the Wrench

- Position the LRI Action Wrench over the barrel nut, ensuring that it fits securely.
- Use the pinch bolt to tighten the wrench around the barrel nut, ensuring a firm grip without overtightening.
- Connect the torque wrench to the LRI Action Wrench's 1/2" drive socket.
- Apply torque according to the specifications provided for your specific barrel nut.

3. PostUse Care

- After completing the task, remove the wrench and inspect it for any damage.
- Clean the wrench to remove any debris or residue.
- Store the wrench in a safe and dry location.

Disposal Instructions

- Dispose of the wrench in accordance with local regulations.
- If the wrench is damaged beyond repair, consider recycling the metal components where possible.
- Do not dispose of the wrench in regular household waste.
