Eases Operation of a Critical Function of Your Rifle - Easy on the Wallet, Too

Battle Arms Development's Cast Enhanced Bolt Catch gives your AR-15 a high-end upgrade at a price that's anything but high. It's a drop-in replacement for a mil-spec catch that offers a significantly larger contact surface that's easier to locate and release the bolt when you're under stress. Pronounced serrations running in two directions give you an excellent, non-slip surface, while the raised "T-Shaped" heel provides a distinct, positive control surface for secure bolt lock back. As Cast Enhanced AR-15 Bolt Catch's name indicates, Battle Arms achieved its impressive combination of ergonomic efficiency and low price-point by investment casting the part. This production process is significantly less costly than machining from billet and produces a part that's just as strong. Lightweight yet extremely durable Made of heat-treated 8620 carbon steel Tough, matte black manganese phosphate Parkerized finish Fits mil-spec AR-15 / M16 / M4 lower receivers Bolt catch ONLY - roll pin, detent & spring NOT included As an added benefit, the Battle Arms Cast Enhanced AR-15 Bolt Catch will not interfere with the Norgon Ambi-Catch, making it an excellent companion upgrade to further enhance rifles fitted with that part.
