

INTERCHANGEABLE FUNNEL HEADS CALIBER SPECIFIC - AREA 419

INTERCHANGEABLE FUNNEL HEAD FOR 20 CALIBER

[Reloading](#) > [Powder Handling](#) > [Powder Funnels](#)

AREA 419 INTERCHANGEABLE FUNNEL HEADS CALIBER SPECIFIC This product listing is for a caliber specific funnel HEAD ONLY, no funnel or billet storage block included. The Area 419 billet aluminum powder funnel uses a system of interchangeable, caliber specific, heads to make it the ultimate funnel for reloaders available today. Universal plastic powder funnels have several issues that are solved with this system. Static cling, plastic is prone to being charged with static and kernels of powder will stick to the walls causing you to have to tap the funnel to get them all to fall. No such thing as universal. There are always cases that just won't work well with the universal design, and funnels tip off and spill powder, or they just plain won't work. Universal means that it has a hole meant for 22 caliber. So, if you are trying to dump 90 grains into a big magnum, you are waiting a long time for the powder to fill. The Area 419 Funnel's interchangeable heads thread onto the funnel and are neck diameter specific for each caliber (color coded to keep track of them). They do not rely on fitting over the body of the case to hold in place. They are sized slightly larger than the neck diameter so that they hold solid on the case. Each head has a bore sized a few thousandths smaller than the bullet diameter, so maximum flow is achieved for each caliber. This is huge for the super ultra magnum guys (375 Cheytac, 408 Cheytac, 50 BMG, etc.). The interface between the heads and the funnel is designed in such a way that no kernels can ever get stuck between the two, as long as the head is tightened completely. The Funnel's design is both aesthetic and performance driven. Being machined from a solid billet of 6061-T6 aluminum means no static charge to cling kernels to the funnel walls. This also makes it far safer for use with black powder. "Flutes" on the outside are for looks on the inside though, they disturb the powder kernels from trying to jam up at the neck. It also gives some airspace, so they do not get packed up so tightly, all aimed to increase flow through the nozzle. 3/8" tall straight section at the top to help prevent kernels of powder from bouncing out when poured in. Smooth surfaces at the neck of the funnel and inside the heads promote quick flow and prevent any sticking kernels. MADE IN USA! From USA made aluminum, on a USA made HAAS mill, with USA made cutting tools! SPECIFICATIONS: Weight: .1 lbs. Dimensions: .8 x .8 x .8 in Caliber: 17 CAL, 20 CAL, 22 CAL, 6MM/243, 25 CAL, 6.5MM/264, 270 CAL, 7MM/284, 30CAL, 338 CAL, 375 CAL, 408 CAL, 450 Rifle, 50BMG, Dillon Powder Die, Pistol, 3" Drop Tube

Safety Instruction Guide for Area 419 Interchangeable Funnel Heads

Introduction

Thank you for choosing the Area 419 Interchangeable Funnel Heads. This product is designed to enhance your reloading experience with its caliber-specific design. To ensure your safety and the proper use of this product, please read this safety instruction guide carefully.

General Safety Guidelines

- Ensure that you are familiar with the safe handling of reloading equipment and components.
- Always wear appropriate eye protection when using reloading tools.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly inspect the funnel heads for any signs of wear or damage before use.
- Do not use the funnel heads for any purpose other than their intended use.
- Follow the manufacturer's recommendations for use and maintenance.

Specific Safety Precautions for Use

- **Static Electricity:**
 - The funnel is made from aluminum to minimize static charge. However, ensure that the funnel and heads are clean and free from dust and debris to prevent static cling.
- **Proper Fit:**
 - Only use funnel heads that are specifically designed for your caliber to ensure proper flow and avoid spills.
- **Handling Powder:**
 - Handle all powder with care, and avoid any open flames or sparks in the vicinity.
- **Installation:**
 - Ensure that funnel heads are securely threaded onto the funnel before use to prevent dislodging during operation.
- **Storage:**
 - Store the funnel heads in a cool, dry place, away from direct sunlight and moisture.

Instructions for Installation and Usage

1. Select the Appropriate Funnel Head:

- Choose the funnel head that matches your caliber. The heads are color-coded for easy identification.

2. Attach the Funnel Head:

- Thread the selected funnel head onto the funnel body until it is securely in place. Ensure it is tightened completely to avoid any gaps.

3. Loading Powder:

- Pour the powder into the funnel slowly to prevent spillage. The design of the funnel helps to minimize the risk of kernels sticking.

4. Monitor Flow:

- Observe the flow of powder through the funnel. If you notice any obstruction, stop pouring and inspect the funnel head for blockages.

5. After Use:

- Clean the funnel and heads after each use to maintain performance. Avoid using abrasive cleaners that may scratch the surface.

Disposal Instructions

- Dispose of any damaged or worn funnel heads in accordance with local regulations.
- Recycle aluminum components whenever possible.
- Do not dispose of any reloading materials or powders in regular waste. Follow local guidelines for hazardous waste disposal.

Contact Information for Further Support

For any inquiries regarding safety, product usage, or support, please reach out to your retailer or the manufacturer directly. Always refer to the product packaging for specific contact details.

By following these safety instructions, you can ensure a safe and effective reloading experience with your Area 419 Interchangeable Funnel Heads. Thank you for your attention to these important guidelines.
