

INTERCHANGEABLE FUNNEL HEADS CALIBER SPECIFIC - AREA 419

INTERCHANGEABLE FUNNEL HEAD FOR 6MM

[Reloading](#) > [Powder Handling](#) > [Powder Funnels](#)

AREA 419 INTERCHANGEABLE FUNNEL HEADS CALIBER SPECIFIC This product listing is for a caliber specific funnel HEAD ONLY, no funnel or billet storage block included. The Area 419 billet aluminum powder funnel uses a system of interchangeable, caliber specific, heads to make it the ultimate funnel for reloaders available today. Universal plastic powder funnels have several issues that are solved with this system. Static cling, plastic is prone to being charged with static and kernels of powder will stick to the walls causing you to have to tap the funnel to get them all to fall. No such thing as universal. There are always cases that just won't work well with the universal design, and funnels tip off and spill powder, or they just plain won't work. Universal means that it has a hole meant for 22 caliber. So, if you are trying to dump 90 grains into a big magnum, you are waiting a long time for the powder to fill. The Area 419 Funnel's interchangeable heads thread onto the funnel and are neck diameter specific for each caliber (color coded to keep track of them). They do not rely on fitting over the body of the case to hold in place. They are sized slightly larger than the neck diameter so that they hold solid on the case. Each head has a bore sized a few thousandths smaller than the bullet diameter, so maximum flow is achieved for each caliber. This is huge for the super ultra magnum guys (375 Cheytac, 408 Cheytac, 50 BMG, etc.). The interface between the heads and the funnel is designed in such a way that no kernels can ever get stuck between the two, as long as the head is tightened completely. The Funnel's design is both aesthetic and performance driven. Being machined from a solid billet of 6061-T6 aluminum means no static charge to cling kernels to the funnel walls. This also makes it far safer for use with black powder. "Flutes" on the outside are for looks on the inside though, they disturb the powder kernels from trying to jam up at the neck. It also gives some airspace, so they do not get packed up so tightly, all aimed to increase flow through the nozzle. 3/8" tall straight section at the top to help prevent kernels of powder from bouncing out when poured in. Smooth surfaces at the neck of the funnel and inside the heads promote quick flow and prevent any sticking kernels. MADE IN USA! From USA made aluminum, on a USA made HAAS mill, with USA made cutting tools! SPECIFICATIONS: Weight: .1 lbs. Dimensions: .8 x .8 x .8 in Caliber: 17 CAL, 20 CAL, 22 CAL, 6MM/243, 25 CAL, 6.5MM/264, 270 CAL, 7MM/284, 30CAL, 338 CAL, 375 CAL, 408 CAL, 450 Rifle, 50BMG, Dillon Powder Die, Pistol, 3" Drop Tube

Attributes

Safety Instruction Guide for AREA 419 Interchangeable Funnel Heads

Introduction

Thank you for choosing the AREA 419 Interchangeable Funnel Heads. This guide provides essential safety instructions and information to ensure the safe use of this product. Please read the entire guide carefully before using the funnel heads.

General Safety Guidelines

- Ensure that the funnel heads are used only for their intended purpose.
- Always handle the funnel heads with care to avoid damage.
- Keep the funnel heads out of reach of children and vulnerable individuals.
- Inspect the funnel heads regularly for any signs of wear or damage before use.
- Follow all instructions for installation and usage to prevent accidents.

Specific Safety Precautions for Use

- **Static Electricity:** The funnel heads are designed to minimize static cling. However, be cautious when using them with powder, as static can still occur. Tap the funnel gently to ensure all powder flows freely.
- **Compatibility:** Use only the funnel heads that are specifically designed for your caliber. Using the wrong head can lead to spills and unsafe conditions.
- **Assembly:** Ensure that the funnel head is securely threaded onto the funnel before use. A loose connection can lead to spills and contamination.
- **Flow Control:** When pouring powder, do so slowly to prevent overflow and spills. The design of the funnel heads allows for maximum flow, but control is essential.
- **Storage:** Store the funnel heads in a dry and safe location to prevent damage and contamination.

Instructions for Installation and Usage

1. Selecting the Right Head:

- Choose the funnel head that matches the caliber you are using. The heads are colorcoded for easy identification.

2. Attaching the Funnel Head:

- Align the threads of the funnel head with the funnel body.
- Screw the funnel head onto the funnel until it is secure. Ensure it is tightened completely to avoid any gaps.

3. Using the Funnel:

- Place the funnel securely over the case or container you are filling.
- Slowly pour the powder into the funnel. Monitor the flow and adjust as necessary to prevent spills.
- After pouring, check that no powder is stuck in the funnel or the head.

4. Cleaning After Use:

- After each use, clean the funnel heads and funnel with a soft brush or cloth to remove any residue.
- Avoid using harsh chemicals or abrasive materials that could damage the surface.

Disposal Instructions

- Dispose of any damaged or unusable funnel heads in accordance with local regulations.
- If the product is no longer needed, check with local waste management for proper disposal methods to minimize environmental impact.

Contact Information for Further Support

For any inquiries regarding safety or usage, please refer to the contact information provided by the retailer or manufacturer. It is essential to have access to support for any safety concerns or product issues.

By following these guidelines, you can ensure a safe and effective experience with the AREA 419 Interchangeable Funnel Heads. Thank you for prioritizing safety in your reloading practices.
