

INTERCHANGEABLE FUNNEL HEADS CALIBER SPECIFIC - AREA 419

INTERCHANGEABLE FUNNEL HEAD FOR 30 CALIBER

[Reloading](#) > [Powder Handling](#) > [Powder Funnels](#)

AREA 419 INTERCHANGEABLE FUNNEL HEADS CALIBER SPECIFIC This product listing is for a caliber specific funnel HEAD ONLY, no funnel or billet storage block included. The Area 419 billet aluminum powder funnel uses a system of interchangeable, caliber specific, heads to make it the ultimate funnel for reloaders available today. Universal plastic powder funnels have several issues that are solved with this system. Static cling, plastic is prone to being charged with static and kernels of powder will stick to the walls causing you to have to tap the funnel to get them all to fall. No such thing as universal. There are always cases that just won't work well with the universal design, and funnels tip off and spill powder, or they just plain won't work. Universal means that it has a hole meant for 22 caliber. So, if you are trying to dump 90 grains into a big magnum, you are waiting a long time for the powder to fill. The Area 419 Funnel's interchangeable heads thread onto the funnel and are neck diameter specific for each caliber (color coded to keep track of them). They do not rely on fitting over the body of the case to hold in place. They are sized slightly larger than the neck diameter so that they hold solid on the case. Each head has a bore sized a few thousandths smaller than the bullet diameter, so maximum flow is achieved for each caliber. This is huge for the super ultra magnum guys (375 Cheytac, 408 Cheytac, 50 BMG, etc.). The interface between the heads and the funnel is designed in such a way that no kernels can ever get stuck between the two, as long as the head is tightened completely. The Funnel's design is both aesthetic and performance driven. Being machined from a solid billet of 6061-T6 aluminum means no static charge to cling kernels to the funnel walls. This also makes it far safer for use with black powder. "Flutes" on the outside are for looks on the inside though, they disturb the powder kernels from trying to jam up at the neck. It also gives some airspace, so they do not get packed up so tightly, all aimed to increase flow through the nozzle. 3/8" tall straight section at the top to help prevent kernels of powder from bouncing out when poured in. Smooth surfaces at the neck of the funnel and inside the heads promote quick flow and prevent any sticking kernels. MADE IN USA! From USA made aluminum, on a USA made HAAS mill, with USA made cutting tools! SPECIFICATIONS: Weight: .1 lbs. Dimensions: .8 x .8 x .8 in Caliber: 17 CAL, 20 CAL, 22 CAL, 6MM/243, 25 CAL, 6.5MM/264, 270 CAL, 7MM/284, 30CAL, 338 CAL, 375 CAL, 408 CAL, 450 Rifle, 50BMG, Dillon Powder Die, Pistol, 3" Drop Tube

Attributes

- Name: [AREA 419 INTERCHANGEABLE FUNNEL HEAD FOR 30 CALIBER](#)
- Manufacturer: [AREA 419](#)
- Product no.: 100029588
- Mfr. No.: 419-FN-HEAD-30
- Caliber: 30 Caliber (.310)
- Delivery weight: 0.011kg
- Shipping height: 16mm
- Shipping width: 76mm
- Shipping length: 146mm
- UPC: 853675008648

Safety Instruction Guide for AREA 419 Interchangeable Funnel Heads

Introduction

Thank you for choosing the AREA 419 Interchangeable Funnel Heads. This guide provides important safety information and instructions to ensure the safe and effective use of the funnel heads. Please read this guide carefully before use to understand the potential hazards, safety precautions, and proper handling procedures.

General Safety Guidelines

- Ensure that the product is only used as intended, for the specific calibers listed.
- Always inspect the funnel heads for any signs of damage or wear before each use.
- Store the funnel heads in a safe, dry place away from extreme temperatures and humidity.
- Keep the product out of reach of children and pets to prevent accidental injury or misuse.
- If you experience any issues with the product, discontinue use immediately and seek assistance.

Specific Safety Precautions for Use

- **Static Electricity:** The funnel heads are designed to minimize static cling. However, always handle them with care to prevent any static-related issues when using with powder.
- **Compatibility:** Ensure that the funnel head you are using is specifically designed for the caliber of powder you are working with. Using the wrong size may lead to spills or inefficient pouring.
- **Tightening Heads:** Always ensure that the funnel head is securely tightened onto the funnel body to prevent any powder from getting stuck or causing a blockage.
- **Black Powder Use:** When using with black powder, ensure that the funnel is clean and dry to prevent any reactions or hazards.
- **Pouring Technique:** When pouring powder, do so slowly and at an angle to avoid splashing or spilling.
- **Ventilation:** Ensure that your working area is well-ventilated, especially when using powders that may produce fumes.

Instructions for Installation and Usage

1. Selecting the Funnel Head:

- Choose the appropriate funnel head based on the caliber you are working with. Refer to the specifications to ensure compatibility.

2. Attaching the Funnel Head:

- Align the funnel head with the threaded opening of the funnel body.
- Thread the head onto the funnel body by turning it clockwise until it is securely tightened.

3. Using the Funnel:

- Place the funnel over the case or container you wish to fill with powder.
- Pour the desired amount of powder slowly into the funnel opening.
- Monitor the flow of powder to ensure it is moving smoothly without blockage.

4. Removing the Funnel Head:

- Once you have finished using the funnel, carefully unscrew the funnel head by turning it counterclockwise.

- Clean the funnel head and funnel body according to the cleaning instructions provided.

5. Cleaning and Maintenance:

- After each use, clean the funnel heads with a soft cloth to remove any powder residue.
- Do not use abrasive materials or chemicals that could damage the funnel heads.

Disposal Instructions

- Dispose of any damaged or worn funnel heads in accordance with local regulations.
- Recycle the aluminum components where possible, as they are made from recyclable materials.
- Do not dispose of the product in regular household waste if it is still functional; consider donating or repurposing.

Contact Information for Further Support

For any questions or concerns regarding the safety and use of the AREA 419 Interchangeable Funnel Heads, please refer to the manufacturer's contact information provided with your product packaging or visit the official website for support resources.

By following these safety instructions, you can ensure a safe and effective experience with your AREA 419 Interchangeable Funnel Heads. Thank you for your attention to safety, and happy reloading!
