## INTERCHANGEABLE FUNNEL HEAD FOR 375 CALIBER

[Reloading](#) > [Powder Handling](#) > [Powder Funnels](#)

AREA 419 INTERCHANGEABLE FUNNEL HEADS CALIBER SPECIFIC This product listing is for a caliber specific funnel HEAD ONLY, no funnel or billet storage block included. The Area 419 billet aluminum powder funnel uses a system of interchangeable, caliber specific, heads to make it the ultimate funnel for reloaders available today. Universal plastic powder funnels have several issues that are solved with this system. Static cling, plastic is prone to being charged with static and kernels of powder will stick to the walls causing you to have to tap the funnel to get them all to fall. No such thing as universal. There are always cases that just won't work well with the universal design, and funnels tip off and spill powder, or they just plain won't work. Universal means that it has a hole meant for 22 caliber. So, if you are trying to dump 90 grains into a big magnum, you are waiting a long time for the powder to fill. The Area 419 Funnel's interchangeable heads thread onto the funnel and are neck diameter specific for each caliber (color coded to keep track of them). They do not rely on fitting over the body of the case to hold in place. They are sized slightly larger than the neck diameter so that they hold solid on the case. Each head has a bore sized a few thousandths smaller than the bullet diameter, so maximum flow is achieved for each caliber. This is huge for the super ultra magnum guys (375 Cheytac, 408 Cheytac, 50 BMG, etc.). The interface between the heads and the funnel is designed in such a way that no kernels can ever get stuck between the two, as long as the head is tightened completely. The Funnel's design is both aesthetic and performance driven. Being machined from a solid billet of 6061-T6 aluminum means no static charge to cling kernels to the funnel walls. This also makes it far safer for use with black powder. "Flutes" on the outside are for looks on the inside though, they disturb the powder kernels from trying to jam up at the neck. It also gives some airspace, so they do not get packed up so tightly, all aimed to increase flow through the nozzle. 3/8" tall straight section at the top to help prevent kernels of powder from bouncing out when poured in. Smooth surfaces at the neck of the funnel and inside the heads promote quick flow and prevent any sticking kernels. MADE IN USA! From USA made aluminum, on a USA made HAAS mill, with USA made cutting tools! SPECIFICATIONS: Weight: .1 lbs. Dimensions: .8 x .8 x .8 in Caliber: 17 CAL, 20 CAL, 22 CAL, 6MM/243, 25 CAL, 6.5MM/264, 270 CAL, 7MM/284, 30CAL, 338 CAL, 375 CAL, 408 CAL, 450 Rifle, 50BMG, Dillon Powder Die, Pistol, 3" Drop Tube

### Attributes

- Name: [AREA 419 INTERCHANGEABLE FUNNEL HEAD FOR 375 CALIBER](#)
- Manufacturer: [AREA 419](#)
- Product no.: 100029590
- Mfr. No.: 419-FN-HEAD-375
- Caliber: 375 Caliber (.375)
- Delivery weight: 0.011kg
- Shipping height: 19mm
- Shipping width: 76mm
- Shipping length: 146mm
- UPC: 853675008655

# Safety Instruction Guide for AREA 419 Interchangeable Funnel Heads

## Introduction

Thank you for choosing the AREA 419 Interchangeable Funnel Heads. This guide is designed to provide you with essential safety instructions and usage guidelines to ensure a safe and effective experience with your product. Please read this guide carefully and keep it for future reference.

## General Safety Guidelines

- Ensure safe use of the funnel head by following the instructions provided in this guide.
- Be aware of potential hazards associated with reloading and using powder funnels.
- Always handle all components with care to avoid injury or damage.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly check for any product recalls or safety alerts through the EU Safety Gate platform.

## Specific Safety Precautions for Use

- **Static Electricity:** The funnel is made from aluminum, which minimizes static cling. However, avoid using it in areas with high static electricity.
- **Proper Handling:** Always handle the funnel head by its body and avoid touching the neck area to prevent contamination.
- **Caliber Specificity:** Use the funnel head that corresponds to your specific caliber. Using the wrong size may lead to spills or misloading.
- **Inspection:** Before each use, inspect the funnel head for any signs of damage or wear. Do not use if damaged.
- **Safe Storage:** Store the funnel heads in a dry place, away from direct sunlight and extreme temperatures.

## Instructions for Installation and Usage

### 1. Installation of Funnel Head:

- Ensure the funnel body is clean and free of any debris.
- Select the appropriate caliberspecific funnel head.
- Thread the funnel head onto the funnel body securely. Ensure it is tightened completely to prevent any leaks or spills.

### 2. Using the Funnel:

- Position the funnel over the case or container where you will be pouring the powder.
- Pour the powder slowly into the funnel. The design allows for maximum flow, so minimal tapping should be needed.
- Monitor the flow of powder to ensure it does not overflow.

### 3. PostUse Care:

- After use, clean the funnel head and body with a soft cloth to remove any powder residue.
- Store the funnel heads in their designated storage area to avoid loss or damage.

## **Disposal Instructions**

- Dispose of any damaged funnel heads in accordance with local regulations.
- Recycling is encouraged where possible. Check with local recycling programs for guidance on aluminum disposal.

## **Contact Information for Further Support**

For any inquiries regarding safety, usage, or product issues, please reach out to the manufacturer or retailer from whom you purchased the product. They will provide you with the necessary support and guidance.

Thank you for your attention to these safety instructions. Enjoy using your AREA 419 Interchangeable Funnel Heads safely and effectively!
