

INTERCHANGEABLE FUNNEL HEADS CALIBER SPECIFIC - AREA 419

INTERCHANGEABLE FUNNEL HEAD FOR 50 BMG

[Reloading](#) > [Powder Handling](#) > [Powder Funnels](#)

AREA 419 INTERCHANGEABLE FUNNEL HEADS CALIBER SPECIFIC This product listing is for a caliber specific funnel HEAD ONLY, no funnel or billet storage block included. The Area 419 billet aluminum powder funnel uses a system of interchangeable, caliber specific, heads to make it the ultimate funnel for reloaders available today. Universal plastic powder funnels have several issues that are solved with this system. Static cling, plastic is prone to being charged with static and kernels of powder will stick to the walls causing you to have to tap the funnel to get them all to fall. No such thing as universal. There are always cases that just won't work well with the universal design, and funnels tip off and spill powder, or they just plain won't work. Universal means that it has a hole meant for 22 caliber. So, if you are trying to dump 90 grains into a big magnum, you are waiting a long time for the powder to fill. The Area 419 Funnel's interchangeable heads thread onto the funnel and are neck diameter specific for each caliber (color coded to keep track of them). They do not rely on fitting over the body of the case to hold in place. They are sized slightly larger than the neck diameter so that they hold solid on the case. Each head has a bore sized a few thousandths smaller than the bullet diameter, so maximum flow is achieved for each caliber. This is huge for the super ultra magnum guys (375 Cheytac, 408 Cheytac, 50 BMG, etc.). The interface between the heads and the funnel is designed in such a way that no kernels can ever get stuck between the two, as long as the head is tightened completely. The Funnel's design is both aesthetic and performance driven. Being machined from a solid billet of 6061-T6 aluminum means no static charge to cling kernels to the funnel walls. This also makes it far safer for use with black powder. "Flutes" on the outside are for looks on the inside though, they disturb the powder kernels from trying to jam up at the neck. It also gives some airspace, so they do not get packed up so tightly, all aimed to increase flow through the nozzle. 3/8" tall straight section at the top to help prevent kernels of powder from bouncing out when poured in. Smooth surfaces at the neck of the funnel and inside the heads promote quick flow and prevent any sticking kernels. MADE IN USA! From USA made aluminum, on a USA made HAAS mill, with USA made cutting tools! SPECIFICATIONS: Weight: .1 lbs. Dimensions: .8 x .8 x .8 in Caliber: 17 CAL, 20 CAL, 22 CAL, 6MM/243, 25 CAL, 6.5MM/264, 270 CAL, 7MM/284, 30CAL, 338 CAL, 375 CAL, 408 CAL, 450 Rifle, 50BMG, Dillon Powder Die, Pistol, 3" Drop Tube

Attributes

- Name: [AREA 419 INTERCHANGEABLE FUNNEL HEAD FOR 50 BMG](#)
- Manufacturer: [AREA 419](#)
- Product no.: 100029592
- Mfr. No.: 419-FN-HEAD-50
- Caliber: 50 Caliber (.500-.501)
- Delivery weight: 0.009kg
- Shipping height: 16mm
- Shipping width: 76mm
- Shipping length: 146mm
- UPC: 853675008679

Safety Instruction Guide for AREA 419 Interchangeable Funnel Heads

Introduction

Thank you for choosing the AREA 419 Interchangeable Funnel Heads. This product is designed to enhance your reloading experience with precision and safety. Please read this safety instruction guide thoroughly to ensure safe use and compliance with all relevant regulations.

General Safety Guidelines

- Ensure that the product is used only for its intended purpose.
- Always handle the funnel heads with care to prevent damage.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly inspect the funnel heads for any signs of wear or damage before use.
- Report any unsafe conditions or incidents to the relevant authorities.

Specific Safety Precautions for Use

- **Static Electricity:** The funnel heads are made from aluminum, which minimizes static cling. However, always ensure the work area is free from materials that may generate static electricity.
- **Compatibility:** Use the funnel heads that are specifically designed for your caliber. Using an incorrect head may lead to spills or ineffective pouring.
- **Secure Fitting:** Ensure that the funnel head is securely threaded onto the funnel before use to prevent accidental detachment during operation.
- **Avoid Overfilling:** Do not overfill the funnel to prevent powder spillage, which can pose a fire hazard.
- **Work Environment:** Use the funnel heads in a wellventilated area, especially when handling powders.

Instructions for Installation and Usage

1. Installation:

- Select the appropriate caliber-specific funnel head for your needs.
- Align the threads of the funnel head with the funnel and gently screw it on until secure.
- Ensure that the head is tightened completely to avoid any gaps where powder could get stuck.

2. Usage:

- Pour powder into the funnel head slowly to allow for maximum flow and to reduce the risk of spillage.
- Monitor the pouring process to ensure that the powder flows smoothly without blockage.
- If you experience any blockage, stop pouring and inspect the funnel head for obstructions.

3. PostUse Care:

- After use, clean the funnel head with a soft cloth to remove any powder residue.
- Store the funnel heads in a dry, safe place to prevent damage.

Disposal Instructions

- Dispose of any damaged or worn funnel heads according to local regulations for aluminum recycling.
- Do not dispose of funnel heads in regular household waste if they are still functional; instead, consider donating or recycling them.

Contact Information for Further Support

For any inquiries regarding safety, usage, or product support, please refer to the manufacturer's contact information provided with your product packaging or visit the official website.

Thank you for prioritizing safety while using the AREA 419 Interchangeable Funnel Heads. Enjoy your reloading experience!
