## INTERCHANGEABLE FUNNEL HEAD FOR DILLON PRESS

[Reloading](#) > [Powder Handling](#) > [Powder Funnels](#)

AREA 419 INTERCHANGEABLE FUNNEL HEADS CALIBER SPECIFIC This product listing is for a caliber specific funnel HEAD ONLY, no funnel or billet storage block included. The Area 419 billet aluminum powder funnel uses a system of interchangeable, caliber specific, heads to make it the ultimate funnel for reloaders available today. Universal plastic powder funnels have several issues that are solved with this system. Static cling, plastic is prone to being charged with static and kernels of powder will stick to the walls causing you to have to tap the funnel to get them all to fall. No such thing as universal. There are always cases that just won't work well with the universal design, and funnels tip off and spill powder, or they just plain won't work. Universal means that it has a hole meant for 22 caliber. So, if you are trying to dump 90 grains into a big magnum, you are waiting a long time for the powder to fill. The Area 419 Funnel's interchangeable heads thread onto the funnel and are neck diameter specific for each caliber (color coded to keep track of them). They do not rely on fitting over the body of the case to hold in place. They are sized slightly larger than the neck diameter so that they hold solid on the case. Each head has a bore sized a few thousandths smaller than the bullet diameter, so maximum flow is achieved for each caliber. This is huge for the super ultra magnum guys (375 Cheytac, 408 Cheytac, 50 BMG, etc.). The interface between the heads and the funnel is designed in such a way that no kernels can ever get stuck between the two, as long as the head is tightened completely. The Funnel's design is both aesthetic and performance driven. Being machined from a solid billet of 6061-T6 aluminum means no static charge to cling kernels to the funnel walls. This also makes it far safer for use with black powder. "Flutes" on the outside are for looks on the inside though, they disturb the powder kernels from trying to jam up at the neck. It also gives some airspace, so they do not get packed up so tightly, all aimed to increase flow through the nozzle. 3/8" tall straight section at the top to help prevent kernels of powder from bouncing out when poured in. Smooth surfaces at the neck of the funnel and inside the heads promote quick flow and prevent any sticking kernels. MADE IN USA! From USA made aluminum, on a USA made HAAS mill, with USA made cutting tools! SPECIFICATIONS: Weight: .1 lbs. Dimensions: .8 x .8 x .8 in Caliber: 17 CAL, 20 CAL, 22 CAL, 6MM/243, 25 CAL, 6.5MM/264, 270 CAL, 7MM/284, 30CAL, 338 CAL, 375 CAL, 408 CAL, 450 Rifle, 50BMG, Dillon Powder Die, Pistol, 3" Drop Tube

### Attributes

# Safety Instruction Guide for AREA 419 Interchangeable Funnel Heads

## Introduction

Thank you for choosing the AREA 419 Interchangeable Funnel Heads for your reloading needs. This product is designed to enhance your reloading experience while ensuring safety and efficiency. This guide provides essential safety instructions and information to ensure the safe use of the funnel heads.

## General Safety Guidelines

- Always use the funnel heads as intended and follow the manufacturer's instructions.
- Inspect the funnel heads for any damage before each use. Do not use damaged components.
- Keep the funnel heads out of reach of children and vulnerable individuals.
- Store the funnel heads in a safe, dry place when not in use.
- Be aware of your surroundings and ensure that no flammable materials are nearby when using the funnel heads.
- Report any unsafe products or accidents to the appropriate authorities.

## Specific Safety Precautions for Use

- Ensure that the funnel head is securely attached to the funnel before use to prevent spills.
- Use the correct caliber-specific funnel head to avoid blockages and ensure maximum flow.
- Avoid using the funnel heads with wet or damp powder to prevent clumping.
- Do not attempt to modify the funnel heads or use them for purposes other than intended.
- When pouring powder, do so slowly and steadily to minimize the risk of spillage.
- Always wear appropriate safety gear, such as safety glasses, when using the funnel heads.

## Instructions for Installation and Usage

### 1. Selecting the Right Funnel Head:

- Identify the caliber you are working with.
- Select the corresponding caliber-specific funnel head from your collection.

### 2. Attaching the Funnel Head:

- Align the threads of the funnel head with the funnel.
- Gently twist the funnel head onto the funnel until it is securely fastened.

### 3. Using the Funnel Head:

- Place the funnel over the case you are filling.
- Slowly pour the powder into the funnel.
- Ensure that the powder flows freely through the funnel head without obstruction.

### 4. Removing the Funnel Head:

- After use, carefully unscrew the funnel head from the funnel.
- Store the funnel head in its designated place to avoid damage.

## **Disposal Instructions**

- Dispose of any damaged or unusable funnel heads in accordance with local regulations.
- Recycle materials when possible, following your local recycling guidelines.
- Do not dispose of funnel heads in fire or extreme heat, as they may release harmful substances.

## **Contact Information for Further Support**

For any inquiries or support regarding the AREA 419 Interchangeable Funnel Heads, please refer to the manufacturer's contact details provided with your product packaging.

Thank you for prioritizing safety while using the AREA 419 Interchangeable Funnel Heads. Enjoy your reloading experience!
