Upgraded Part Helps You Make Fast Mag Changes When the Pressure's On

The Vickers Tactical GMR-006 Extended Magazine Release from Tangodown is a simple, drop-in upgrade for the Glock® 43 that makes it easy for the shooter to drop the magazine quickly under stress. Unlike the small factory part that causes many shooters to shift their grip in order to operate the release, the Vickers Tactical button is optimized for fast, positive operation regardless of the size or length of your thumb. The deeply serrated contact surface ensures that once you locate the button, your thumb will not slip, even if your hand is wet. Made of tough reinforced molded polymer Easy to install in a few minutes Requires no other alterations required to pistol Available in four distinctive colors The GMR-006 extended mag release is contoured so it's easy to locate by feel, while the same time it resists unintentional activation, such as when you place your G43 on a hard surface. The Vickers Tactical extended magazine release for Glock 43® is also ambidextrous. Both characteristics provide a valuable advantage on this extremely compact concealed carry pistol.
